PROFESSIONAL STATEMENT

I am an international student from Russia, starting my first year at Temple University. My biggest interest for years has been information technology.

At NRG and D&T I learned how to search, identify, extract, audit and analyze data in order to provide meaningful feedback. I have also handled financial data and compiled reports. I have worked in sync with the Senior Software Engineers on tasks that have reduced costs for the company and increased customer satisfaction.

My friendly and outgoing personality allows me to interact well with company employees of all levels.

EXPERIENCE

Sep 2016 -
March 2017
