MIS 2501

SharePoint

We should invest in SharePoint because it would increase our revenue by **\$2,100,000** in three years. SharePoint's seamless collaboration allows people both inside and outside the organization to share and create documents online at the same time. This will eliminate a major problem of too many non-billable by increasing our billable hours per PMP by 400 each year.

SharePoint's key capability is that it offers seamless collaboration. For example, our PMPs will no longer have to spend a lot of their time sharing and managing multiple versions of the same document. Instead, SharePoint will allow people inside and outside the organization to access the document at the same time and make edits. SharePoint will increase our PMPs billable hours from 1,500 to 1,900 per year, which is an extra 12,000 billable hours in three years

Investing in SharePoint would give us a net benefit of **\$1,846,250** in a three-year period. The total cost of this investment would be **\$253,750**, which includes the cost of hardware, software, maintenance, and administration and support of the system. After three years our revenue would be increased by **\$2,100,000**.

hours billed now				
	year 1	year 2	year 3	total
10 PMP billing	2,625,000	2,625,000	2,625,000	7,875,000

With SharePoint				
cost	year 1	year 2	year 3	Total
Hardware	100,000	0	0	100,000
maintenance	18,000	18,000	18,000	54,000
administering system	33,250	33,250	33,250	99,750
			total cost	253,750
Benefits	year 1	year 2	year 3	total
10 PMP billing	3,325,000	3,325,000	3,325,000	9,975,000
			benefits - cost	9,721,250
			net benefits	1,846,250
