I am currently a student at Temple University's Fox School of Business; I speak English and Spanish fluently. My goal is to finish my degree and work on my career in the field of business management; therefore I need a job with opportunities to grow as a professional and to gain the experience necessary for my career. Some of the courses that I have completed include managerial accounting, financial accounting, macro economics, micro economics, and introduction to business among others. I am a quick learner and easy to get along with, I take assignments seriously and tend to finish tasks on time or earlier than expected. When completing tasks, I tend to double check my work before submitting the final product.
