SharePoint

An investment in SharePoint will yield a three-year net benefit of \$1,846,250. SharePoint is a collaborative tool for storage, organization, and document sharing. It will help our PMPs to better manage documents, allowing them to be available for more billable hours.

SharePoint is a content management system, primarily used for collaboration work. Our company can easily share documents between colleagues and clients in a secure and central location. The use of SharePoint will streamline the communication process with clients. The additional 400 hours of billable hours created by SharePoint will help to eliminate backlog of work and increase revenue.

The upgrade will cost \$235,750 over three years for purchasing and maintenance of software and hardware. Over three years the benefit from additional billable hours totals \$2,100,000. Excluding the costs of implementing the system, the three-year net benefit of switching to SharePoint is \$1,846,250.

	Year 1	Year 2	Year 3	Total
Cost to Buy	\$100,000	\$0	\$0	\$100,000
Maintenance	\$18,000	\$18,000	\$18,000	\$54,000
10% Person	\$33,250	\$33,250	\$33,250	\$99,750
Total Costs				\$253,750

	Year 1	Year 2	Year 3	Total
Increased Revenue	\$70,000	\$70,000	\$70,000	\$2,100,000
Total				\$2,100,000

3 Year Net Benefit				\$1,846,250
