By investing in SharePoint our net benefit in savings will be \$1,846,250 over the next three years. Microsoft SharePoint is a browser-based platform that is easy to manage, collaborate, and interact with clients.

The main benefit of SharePoint is its interactive sharing. Interactive sharing allows a centralized environment with real-time edits and updates. SharePoint is a platform designed to help with team collaboration, edits, and shares. The increase in our efficiency will allow us to work 1900 hours instead of 1500 hours.

The three-year savings will be \$2,100,000 after we pay for the starting investment. Our net benefit of \$1,846,250, and a more effective workforce, come from the cost of purchasing hardware, software, support, and maintenance, which will total \$ 253,750 over the next three years.
