Feature Name: Tracking Prospective Clients

1.1 Use Case(s)

Use Case ID:	Enter a unique numeric identifier for the Use Case. e.g. UC-1.2.1		
Use Case Name:	Tracking Prospective Clients		
Created By:	Team L	Last Updated By:	Team L
Date Created:	4/17/2017	Last Revision Date:	4/17/2017
Actors:	Prospective clients that want to view make-up on their skin tone		
Description:	Track types of prospective clients. Male, Female, and skin tones		
Trigger:	Actor selects what pronoun they identify as and then skin tone, after selection data is recorded to analyze, and track which combinations are most popular.		
Preconditions:	<p>[List any activities that must take place, or any conditions that must be true, before the use case can be started. Number each pre-condition. e.g.]</p> <ol style="list-style-type: none"> 1. Actor has come to the website 2. Actor selected to view the makeup on models of the same skin tone 3. Actor selects their own skin tone 4. Led to video representing that pronoun and skin tone with recommended makeup color 		
Postconditions:	<p>[Describe the state of the system at the conclusion of the use case execution. Should include both <i>minimal guarantees</i> (what must happen even if the actor's goal is not achieved) and the <i>success guarantees</i> (what happens when the actor's goal is achieved. Number each post-condition. e.g.]</p> <ol style="list-style-type: none"> 1. Actor has a better understanding and feeling of how makeup will look in relation to themselves. 2. Actor has seen makeup used and modeled before purchasing 		
Normal Flow:	<p>[Provide a detailed description of the user actions and system responses that will take place during execution of the use case under normal, expected conditions. This dialog sequence will ultimately lead to accomplishing the goal stated in the use case name and description.]</p> <ol style="list-style-type: none"> 1. Actor enters site 2. Actor selects to view makeup on model 3. Actor selects skin tone that best represents what they want to see 4. Actor views video provided, as well as models wearing makeup 5. Actor decides to choose a color not provided 6. Actor specifies identifying pronoun 7. Actor selects color they wish to submit 8. Actor submits email to database for information collection 		
Variations: [Alternative Flow 1 – Not in Network]	<p>[Document legitimate branches from the main flow to handle special conditions (also known as extensions). For each alternative flow reference the branching step number of the normal flow and the condition which must be true in order for this extension to be executed. e.g. Alternative flows in the <i>Withdraw Cash</i> transaction:</p> <ol style="list-style-type: none"> 1a. In step 3 of the normal flow <ol style="list-style-type: none"> 1. Pronouns determine which models are displayed (Male, Female) 2a. In step 4 of normal flow <ol style="list-style-type: none"> 1. Each skin tone represents a different model to be displayed for respective tones 		

	<p>3a. In step 6 of normal flow</p> <ol style="list-style-type: none">1. Actor selects what pronoun they identify with2. Actor selects what color makeup to be displayed
Exceptions:	<p>[Describe any anticipated error conditions that could occur during execution of the use case, and define how the system is to respond to those conditions. e.g. Exceptions to the Withdraw Case transaction</p> <ol style="list-style-type: none">1. Skin tone that actor wants to see if not fully displayed
