Flash Research Assignment SharePoint

Our company could potentially miss a net benefit of \$1.8 million over three years. Our company needs to invest in integrating SharePoint for document management and storage. SharePoint will allow our PMPs to spend more time creating value for clients instead of wasting time on managing documents.

The key capability of SharePoint is document management and the ability to share information between clients and employees. SharePoint is a collaborative software which means groups can set up a secure place where documents can be shared and edited. SharePoint will allow PMPs to increase their billable hours by 400 hours per year by allowing them to work on other duties since SharePoint can organize their documents.

Share point will result in a net benefit of \$1,846,250 over three years. This comes from a total benefit of \$2,100,000. The three-year cost for SharePoint is \$253,750 which includes installation, maintenance, and SharePoint support.

Benefits	Year 1	Year 2	Year 3	Total
As is	\$2,625,000	\$2,625,000	\$2,625,000	
With Sharepoint	\$3,325,000	\$3,325,000	\$3,325,000	
Total	\$700,000	\$700,000	\$700,000	\$2,100,000
Costs				
Hardware Purchase	\$100,000			\$100,000
Maintenance	\$18,000	\$18,000	\$18,000	\$54,000
SharePoint Expert	\$33,250	\$33,250	\$33,250	\$99,750
Total				\$253,750
Net Benefits	\$3,173,750	\$3,273,750	\$3,273,750	\$1,846,250
