

Is your iPad running slow? Follow these processes to improve your iPads performance.

I. Stop all Running Apps

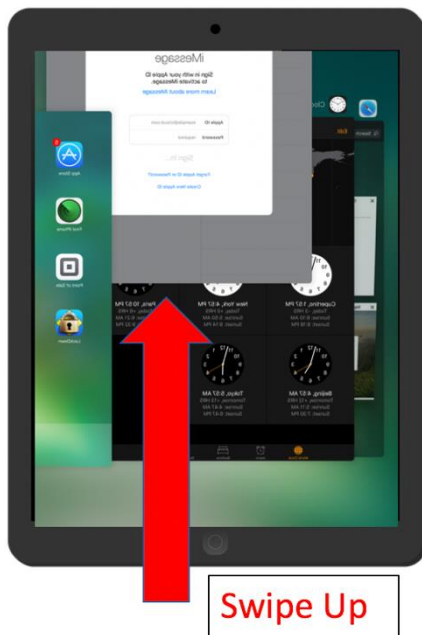

1. Double-click the **Home Button**.

2. Your screen will then show all of the running apps next to each other.

3. To stop them from running, swipe up ↑ on each separate page until there are no more.

II. Delete Internet Cache/Cookies on you Safari

1. Select the **Settings** app on the home screen.
2. Scroll down the menu and select **Safari**.
3. Scroll down to the bottom of the right-hand panel and select **Clear History and Website Data**.
4. Confirm by selecting **Clear**.

III. Backup Unused Photos

1. Download **Google Photos** from the **App Store**. (Only if you have a Gmail Account).
2. Sign In, then select the **Account Menu** icon. 
3. Select the **Settings** icon. 
4. Select **Back Up and Sync**.
5. Toggle **Back Up and Sync** to on. 
6. Make sure **Google Photos** has access to **Photos** (**Settings** > **Google Photos** > **Photos**).

IV. Delete Unused Photos/Videos

1. From the home screen, select **Photos**.
2. Select the **Albums**  tab at the bottom.
3. Select the **All Photos** album.
4. Select the **Select** in the top right.
5. Check off which photos/videos you want to be deleted.
6. Select **Trash** icon in the bottom right. 
7. Select **Delete # Photos**.
8. Back in the **Albums** tab homepage, go to the **Recently Deleted** homepage.
9. Select the **Select** in the top right.
10. Select **Delete All** at the bottom left.
11. Select **Delete # Photos**.

V. Delete Unused Apps

1. From the home screen, select **Settings**.
2. Select **General**.
3. Select **Storage and iCloud Usage**.
4. Select **Storage**.
5. Select **Manage Storage**.
