By applying SharePoint, our company will make additional revenue of \$1,846,250 over a three-year period. SharePoint will allow our team of PMPs to manage and collaborate documents more efficiently and increase our productivity. With SharePoint, our PMPs will spend less of their time managing documents and more time working on projects with clients. This will increase their billable hours and increase our revenue.

SharePoint is a web application platform that allows multiple users to share and collaborate documents on their cloud server. The key benefit of SharePoint is that it will increase the productivity of our PMPs because they will spend less time managing documents and more time on creating value for our clients. We don't pay our PMPs to manage documents, so with SharePoint we can increase their billable hours by 400 hours per year for each PMP.

Over the course of the next three-year period we would have a cost of \$253,750 with included installation, maintenance, and administrative support from one PMP. The investment to SharePoint will give our company additional revenue from more billable hours with the total benefit of \$2,100,000. Overall, in a three-year period our company will have a net benefit of \$1,846,250.

	Year 1	Year 2	Year 3	Total
Cost:				
Hardware/Software	\$100,000	\$0	\$0	\$100,000
Maintenance	\$18,000	\$18,000	\$18,000	\$54,000
Admin/Support PMP	\$33,250	\$33,250	\$33,250	\$99,750
Total Cost:				\$253,750
Benefit:				
Revenue from billable hours (1900 for 10 PMP)	\$700,000	\$700,000	\$700,000	\$2,100,000
Total Benefit:				\$2,100,000
Net Benefit:				\$1,846,250
