

Personal Journal entry Week5:

The prototype is starting to come along. It is still a little rough around the edges, but they are making a lot of progress this early on into the project which has me excited to see what it will look like when we are finally finished. Our BAs continue to work on the project scope and fix it up. They have met with Moustafellos multiple times about the scope and other project documents which in my mind is the best way to make sure that they are up to par.
