Michael Bonatsos

SharePoint

Investing in SharePoint will increase the productivity of our project management professionals and save our company $1.8 million dollars in three years. SharePoint offers the team of PMPs the ability to collaborate in real-time. Through the use of SharePoint, the PMPs will increase their workload and in turn increase revenue.

SharePoint is software used to store, organize, share and access information from almost any device (Microsoft). The ability to share real-time information with team members and clients will reduce the time spent on managing documents and instead will allow more time to create value for our clients. With the ability to share documents in real-time, there will only be one updated version of a specific document, instead of multiple versions.

The total cost of investment, maintenance, and support for the SharePoint software is $253,750 over the next three years. Total net benefit over this period will be close to $1.9 million, which benefits our company $2.1 million in billable hours by increasing productivity in the first three years.

	Year 1	Year 2	Year 3	Total
Costs				
Investment	$100,000	0	0	$100,000
Maintenance	$18,000	$18,000	$18,000	$54,000
Support from PMP	$33,250	$33,250	$33,250	$99,750
Total Cost				**$253,750**
Benefits				
Billed Hrs. (10 PMPs @400hrs.) $175 an hr.	$700,000	$700,000	$700,000	**$2,100,000**
Net Benefit				**$1,846,250**
