

Friday, Jan 23
9:00 AM

The day, date, and time the medication is scheduled to be taken

Whats inside:

1 IBUPROPHEN 800MG
1 CALCIUM 600 MG
1 LISINOPRIL 20MG

A list the medications included in this pack

This bar code is used to track when this specific pack is removed from the box.

Scan here for more information on these medications

Here the patient can also scan the bar code via the app to get detailed information on each medication inside this pack.

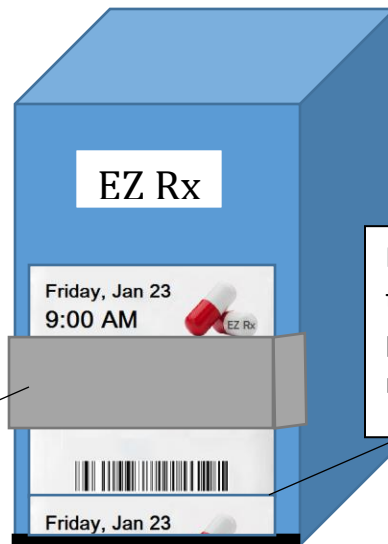

Friday, Jan 23
9:00 AM

Where the patient will tear apart the medications

Dispenser will hold roll of medications and easily be refilled with each month's roll of medications.

A bar code reader located here will scan and record when each pack of medication is removed.

Packets are connected so that the next medication pack will be pulled up as the previous one is removed.
