Bloomberg Businessweek

October Data Point the Way to a 'Jobless Recovery'

American unemployment

Forgotten men

The jobless recovery, long prophesied, is here

 **The
Economist**

Spending Spree | Businesses splurge on machines, not muscle

Change since each recovery began in ■ spending by business on equipment, software; adjusted for inflation* ■ the number of private-industry jobs

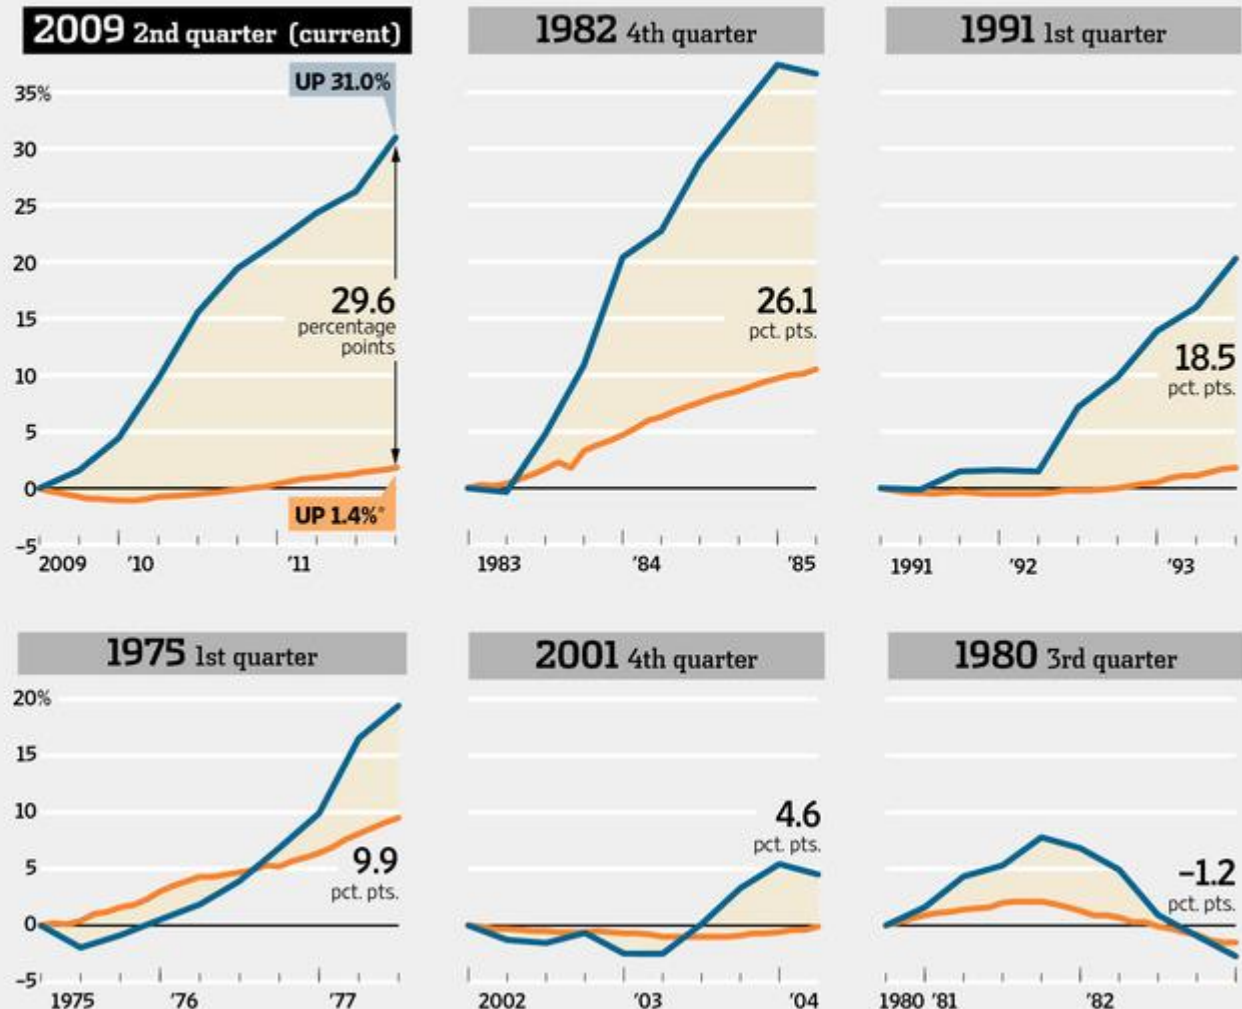

In the current recovery, **business spending on equipment and software** has rebounded faster than usual...

...while **private-industry jobs** have been relatively slow to return...

The **difference** between the speed of the rebound in business investment in equipment and software and that in private-industry hiring is **the widest in decades**, as a result.

[†]The 1991 recovery was so similar to the current one that the lines overlap.

*Through September because latest figure available for nonresidential fixed investment in equipment and software is for the third quarter of 2011. As of December, the number of private-industry jobs had risen 1.8% from the June 2009 level

Note: Start date for each chart is the first full quarter of each recovery as defined by National Bureau of Economic Research.

Sources: Commerce Department; Labor Department

What does this mean and *Why?*

More Bang for the Buck

The value of goods and services produced for every hour worked has grown sharply in the nonfarm business sector during this recovery—while the total number of hours worked is up only a bit. The upshot: The ratio of compensation to productivity, or unit labor costs, has been falling.

Change since the recovery's start in:

"You're hired, but remember, you can be replaced by a machine...believe me."

Wall Street Bankers vs. the Machines

BloombergBusinessweek
Markets & Finance

Wall Street banks are replacing people with computers to trade financial instruments that once generated some of their biggest profits. Late last month, UBS (UBS), Switzerland's biggest bank, fired its head of credit-default swap index trading, David Gellers, and replaced him with computer algorithms that trade using mathematical models, according to two people familiar with the matter

Pilots vs. the Machines

Ryanair's O'Leary Calls for Single-Pilot Commercial Flights

AIN AIR TRANSPORT PERSPECTIVE » SEPTEMBER 10, 2010

by CHARLES ALCOCK

September 10, 2010, 7:26 AM

Where did he go?

... chief executive Michael O'Leary indicated that he will start to purchase 300 new aircraft but whether Ryanair enters the competition for the fleet renewal remains a matter of speculation.
 (Photo: Matt Banks)

Ryanair chief executive Michael O'Leary is pushing for single-pilot commercial aircraft operations. In a September 8 interview with the *Financial Times*, O'Leary argued that copilots are essentially redundant in modern airliners because "the computer does most of the flying." The Ireland-based low-cost carrier subsequently confirmed that it initiated a dialogue with aviation authorities regarding the possibility of legalizing single-pilot operations, but in a statement made clear that the proposal remains at an early stage. "No formal approach has been

made, but we are starting the debate so that we can look to reduce costs without compromising safety," Ryanair said in the statement. "Given the sophistication of our aircraft we believe that one pilot flying can operate safely on short routes and reduce fares for all passengers."

How long do you want to live?

- How long do you think you'll live?
- Then, when do you have to retire if you want to live up to 100 years?
- What kind of technology breakthroughs will take place *for the next 50 years*?

<http://physics.illinois.edu/history/timelines/1960s.asp>

Let's face it.

- Automation and outsourcing are irreversible trends.
- No occupation is immune to this trend.
- New technologies will continue to emerge for our lifetime and *fundamentally transform* the society and the job market (probably faster and faster).

http://www.bizbash.com/will_these_tech_advances_change_the_future_of_events/new-york/story/25226/

Let's discuss.

- Which kind of occupation will be neither replaced by the machines nor outsourced for the next 30 years?

In order not to be replaced, what kind of skills do we need that the machines don't have?

- Creative, innovative, analytic thinking
- Problem-solving skills for complex, unstructured, open-ended, non-routine problems
- Face-to-face, human-touch, communication skills (e.g. negotiation, persuasion, writing)
- Entrepreneurship and leadership
- anything else?

<http://www.kansasbob.com/2011/02/man-vs-machine.html>

Google DeepMind Beats Go Champion!

<http://nerdist.com/google-deepmind-beats-legend-lee-sedol-in-game-one-of-five-game-go-series/>

Google DeepDream Draws Arts!

<https://news.artnet.com/market/google-inceptionism-art-sells-big-439352>

We are **NOT** doomed.

- Advances in technologies are creating new opportunities and increasing demands for different skills.
 - Techs destroy some jobs but create new ones too, with the skills in the previous page.
- Tech developments have historically increased the size of the economies for the last several centuries.
- If you can survive in the waves of new technologies, you'll be more thriving than ever before.

[http://en.wikipedia.org/wiki/Survivor_\(U.S._TV_series\)](http://en.wikipedia.org/wiki/Survivor_(U.S._TV_series))

How to survive? – Be Ambidextrous

- You'll need to develop multiple skills and abilities to survive.
- Having one major may not be enough.
- Double major or graduate degree in a *distant* field
- so that, when you lose a job, you can jump into another occupation right away.

That 'Useless' Liberal Arts Degree Has Become Tech's Hottest Ticket

Such creativity can't be programmed. Instead, much of it is minted by one of Slack's 180 employees, [Anna Pickard](#), the 38-year-old editorial director. She earned a theater degree from Britain's Manchester Metropolitan University before discovering that she hated the constant snubs of auditions that didn't work out. After winning acclaim for her blogging, videogame writing and cat impersonations, she found her way into tech, where she cooks up zany replies to users who type in "I love you, Slackbot." It's her mission, Pickard explains, "to provide users with extra bits of surprise and delight." The pay is good; the stock options, even better.

What kind of boss hires a thwarted actress for a business-to-business software startup? Stewart Butterfield, Slack's 42-year-old cofounder and CEO, whose estimated double-digit stake in the company could be worth \$300 million or more. He's the proud holder of an undergraduate degree in philosophy from Canada's University of Victoria and a master's degree from Cambridge in philosophy and the history of science.

How to survive? – Continue to Learn

- Some of the things you are learning here will probably be *obsolete* in the next couple of decades.
- New knowledge keeps produced in an increasingly faster rate.
- Will need to know not only how to use certain software tools, but also how to learn new technology that is not invented yet.
- Will need to be flexible and to transform yourself anytime with new knowledge and skills
- Always be vigilant over and aware of technology trends and take advantage of them

How to survive? – Be valuable, differentiated, and irreplaceable

- According to the five-forces model, differentiated and unique products/services can
 - lessen rivalry among existing competitors and
 - lower bargaining power of buyers.

Why should we hire you? (1/2)

- How would you answer? How would you sell yourself?

<http://www.cnn.com/2009/LIVING/worklife/07/20/cb.why.should.hire.you/>

If the interviewer asks what you've learned here, what would you say?

| Topic | Cases |
|--------------------------------|--|
| IT and Competitive Strategy | Otis Elevator Trinity Health |
| Business Value of IT | San Francisco Airport San Diego Schools B&K Distributors |
| Cost of IT | IVK |
| Strategic IT Outsourcing | IVK |
| IT Risk Management | IVK |
| Enterprise Architecture | IVK |
| IT-Driven Competitive Strategy | ITC eChoupal Airbnb |

Why should we hire you? (2/2)

- There are three finalists for one job position. Only ONE will be hired.
- Explain why you should be the one to be hired to your interviewer. Sell yourself!

Are you here?

The IT leader/general manager capability gap

Are you ready to be...?

- A capable *business leader* specialized in technologies who speaks in business languages and can explain to anyone
 - How IT management should be aligned with competitive strategies
 - How IT helps firms create business opportunities and achieve sustainable competitive strategies
 - How IT resources contribute to value creation in the business and government sectors
 - How to lead organizational transformation and innovation with IT
 - How to manage risks borne out of IT that firms depend on

Risks to MIS Majors

- A recruiter might say,

Well, she/he knows a little bit about business and a little bit about IT too. I get that, which is fine. But I don't think she/he knows either deep enough. I would rather hire a real business major or a real engineering major.

- What would you say to this recruiter?
- If you don't want to hear this, what should you do?

<http://findtheclient.com/2012/02/how-to-win-skeptical-clients/>

What's in your competitive advantages?

- What should be your competitive advantages as an MIS major
 - that differentiate yourself from other majors?
- What should be your core competencies
 - that you can do better than anyone else?
 - Core competencies have to be valuable and inimitable.

Knowing that both business and IT,

- What can you do?
- What *specific skills* do you have?
 - a translator between business people and IT people
 - an ability to translate business problems to technical requirements
 - an ability to use IT to discover new opportunities
 - understanding of finance/accounting
 - understanding of managerial implications of IT (e.g. tradeoff in IT risk management)
 - drawing diagrams

CIOs Struggle with the Great Talent Hunt

Finding IT pros with business skills has always been a bear. So award-winning CIOs are taking radical steps to train, recruit or grow the hybrid staff they covet. (Plus: Meet the new members of the CIO Hall of Fame and the Ones to Watch winners.)

By Stephanie Overby
Wed, May 01, 2013

 4 Comments

"Business savvy comes from years of experience working on the business side, generally at a level high enough to have a broad cross-functional perspective," says Dave Smoley, a 2013 CIO Hall of Fame inductee. "Because technical competence comes from years of experience working and training in math, science and technology, it is rare to find both in one individual." Smoley, until recently the CIO of Flextronics International, joined pharmaceutical company AstraZeneca as CIO on April 15.

"It's hard for tech people--even middle managers on up to senior managers--to think the way that the business thinks," says [Teri Takai, CIO for the Department of Defense](#) and a 2013 CIO Hall of Fame inductee. "They tend to explain things from their own perspective."

CIOs Struggle with the Great Talent Hunt

Finding IT pros with business skills has always been a bear. So award-winning CIOs are taking radical steps to train, recruit or grow the hybrid staff they covet. (Plus: Meet the new members of the CIO Hall of Fame and the Ones to Watch winners.)

By Stephanie Overby
Wed, May 01, 2013

 4 Comments

At the DoD, Takai's lieutenants excel at highly technical projects, but she reminds them that their technical solutions are only as good as their ability to communicate them to senior defense leaders. "I tell them you have to use Aunt Linda language," she says. "How would you explain this to your mother, assuming she's no expert. Or your neighbor?"

At SquareTwo Financial, it took time for IT employees to get comfortable with business discussions. "It's difficult for a developer to stand up say, 'I'm going to show you what my product does and do it in a way that a business person can understand it.' Not, 'Hey, I wrote this code this way and here are my SQL statements,' but, 'Here's the business value of why I designed this the way I did,'" Weeks says.

My Suggestions (1/3)

- You have to be an expert in two areas.
- It is easy to find an expert in one area, but not in two or more.
- An expert in at least one technology area
 - database, business intelligence, system analysis and design, security, project management, and so forth
- An expert in at least one functional area or one industry
 - Finance, accounting, marketing, management, strategy, or operations
 - Retail, manufacturing, hospitality, finance, government, healthcare, and so forth

My Suggestions (2/3)

- What should differentiate you from engineers?
- Communication skills
 - a translator between business-side and technology-side
- Finance / accounting
 - Will this technology create value to my customers and company?
- Understanding of customers and competitors
 - What do customers want?
 - What would competitors do?

Norman Augustine, a former President of Lockheed Martin

*I have concluded that one of the stronger correlations with advancement through the management ranks was **the ability of an individual to express clearly his or her thoughts in writings.***

<http://rescommunis.olemiss.edu/2008/09/03/norman-r-augustine-at-the-university-of-mississippi/>
<https://www.aacu.org/publications-research/periodicals/one-cannot-live-equations-alone-education-life-and-work-twenty>

An email from a former student

I wanted to reach out and thank you for being my professor in MIS 301 and MIS 411 at GMU. After graduating from Mason's School of Business last summer with degrees in Accounting and ISOM, I started working as a Technology Analyst at Freddie Mac in their IT engineering department. After a little while in engineering, I realized it wasn't a good fit due to my limited technical skills and due to my passion for business. I recently interviewed internally at Freddie Mac for a position in IT Strategy. I took the textbook for MIS 411 (Adventures of an IT Leader) and one of my executive reports to my interview and it helped me land the position. I will soon be starting in the IT Strategy space for Freddie Mac and am very much looking forward to the opportunity, as it involves concepts and things I learned in your MIS 411 class, my favorite class during my time in college. So thank you, and I hope you are doing well.

My Suggestions (3/3)

- What should differentiate you from business managers?
- Knowledge on current, up-to-date technologies
 - What you have learned here will be obsolete in a matter of years. DO NOT stop reading technology news or magazines.
- Curiosity and willingness to try something new and innovate.
 - Don't be afraid to try something new, to yourself, to your company, to your colleagues.
 - Be an early adopter, an innovator, and a change leader.
