

MIS 5208 – Data Analytics for IT Auditors and Cybersecurity

Lab 01: Install ACL

Caswell M. Anderson, CISA, CRISC

Caswell.Anderson@temple.edu

Mission and Learning Objectives

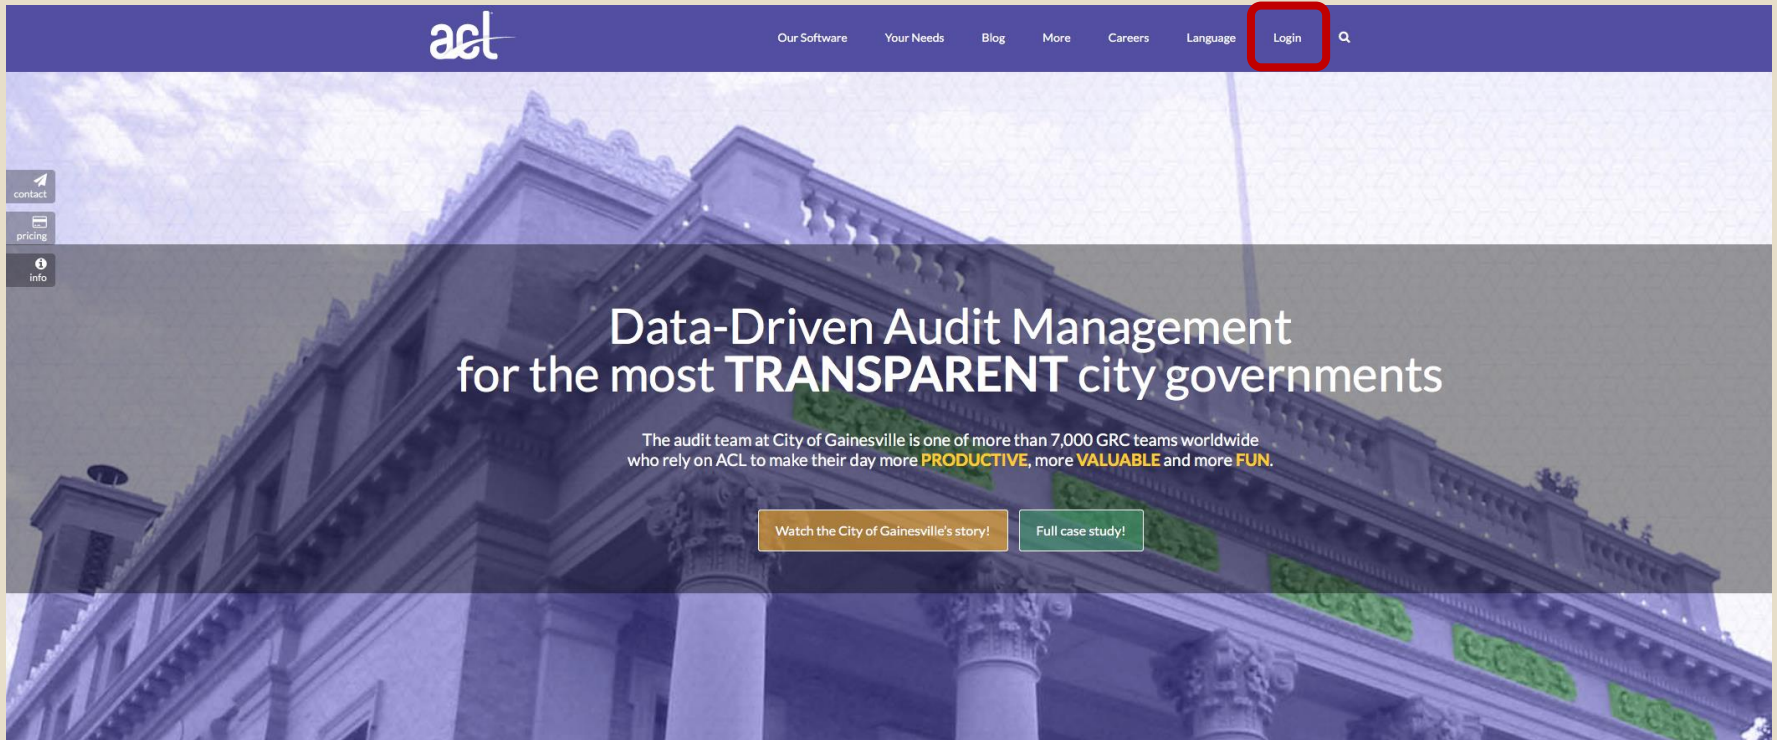

- Understand how to organize and analyze control data
- Understand the principles of transaction-oriented data, and how to store and retrieve data for data sources.
- Understand methods to identify ways in which perpetrators compromise data to affect fraud.
- Identify and compare sources and methods of capturing data throughout a business process.
- Use data mining techniques to identify associations and trends among data.
- Apply data mining techniques to examine control efficacy.
- Integrate data across multiple sources, transforming it into a single view.
- Understand and select appropriate data visualization techniques to effectively communicate the results of an analysis effort.
- Communicate analysis results to stakeholders for ongoing quality assurance and process improvement.

Presentations

- Later in the course you will be asked to present your lab findings on a selective basis – either individually or as a group
- Ideas and proposals in business are now typically communicated via “decks”. Often these decks are not even presented in the formal sense, they just get emailed to the recipient. You need to learn how to communicate your ideas using decks. This is an important skill. You can be the best analyst in the world but if you cannot get your ideas across...
- Writing skills are important but we tend to overemphasize correct grammar and form – not necessarily simple and direct communication – the essence of creating good decks.
- Each slide in your deck should be crafted just like you would craft a canvas of a painting!
- The Cognitive Style of PowerPoint by Edward Tufte (34 Pages)
- Presentation Skills Video: <https://www.youtube.com/watch?v=ayxfblOyUBY> (3:56)
- Presentation Skills Video: <https://www.youtube.com/watch?v=VVP8UGjECt4> (5:20)

ACL Login Screen

The image shows the ACL login interface. On the left is a white login form with the ACL logo, a username field containing 'TUG05176@temple.edu', a password field with masked characters, a green 'SIGN IN' button, and links for 'Reset password' and 'Contact support'. Below these is a link for 'Sign in to a custom domain'. On the right is a promotional banner with a dark blue background and fireworks. A green ribbon at the top reads '★ FALL '17 RELEASE ★'. Below it, the text 'THE FALL RELEASE IS NOW LIVE!' is displayed in large white letters. At the bottom of the banner is an orange button that says 'Click here for all the details >>'.

Step 1: Install the ACL Program

The screenshot shows the ACL program interface. At the top left, it says "Temple University - EDUC" and at the top right, there is an "Options" dropdown menu. The main content is divided into two columns. The left column has a section titled "Your ACL Subscription Includes Results Lite" with a circular image of people looking at documents. Below this is a "Launch Results Lite" button and a "Learn more" button. The right column is titled "Content & Community" and lists several options: "Peer Community", "Tools & Templates", "Training", "Help Docs", and "Tech Support". In the "Downloads & Mobile Apps" section, the "ACL for Windows" link is highlighted with a red box and a red arrow pointing to it with the text "Click Here". A yellow callout box at the bottom right says "We will use all of these links in Lab 01." Other links in the "Downloads & Mobile Apps" section include "Analytics Exchange", "Add-in for Excel", "Premium Analysis Apps", "iOS App", and "Android App".

Choose Extraction Location

The screenshot shows the ACL for Windows installation page. The main content includes a header with the ACL logo, navigation tabs for 'ACL for Windows' and 'Add-in for Excel', and a main section for 'ACL for Windows'. This section features a 'Download Version 13.0.1' button (740 MB | 2017-12-20) and a 'Download Patch' button (8.51 MB | 2017-12-20). A 'Setup Extraction Location' dialog box is overlaid on the page, prompting the user to specify a folder for extraction. The dialog box shows the 'Destination Folder' as '\\Mac\Home\Downloads\ACL Installers\ACL for Windows 1301' and a 'Browse...' button. A red arrow points to the 'Browse...' button with the text 'Click "Browse"'. Below the dialog box, there are sections for 'Instructions', 'Activation / Other Info', and 'Installing ACL Direct Link'. The 'Instructions' section lists three steps: 1. Download the ACL for Windows installation package by clicking the link above. 2. Close all other Windows applications. 3. Double-click the installation package and follow the instructions. The 'Activation / Other Info' section explains that after installation, the user needs to activate it using their ACL user ID and password, and that the activation assigns one of the organization's subscription licenses to them. The 'Installing ACL Direct Link' section states that Direct Link requires ACL Analytics and the SAP GUI to be already installed and provides a link to 'Installing Direct Link'.

ACL Edition Selection
Important: Make sure that the edition you install is the correct one for your organization.
Select the edition of ACL for Windows to install:
 Non-Unicode
 Unicode
< Back Next >

Instructions
To install:
1. Download the ACL for Windows installation package by clicking the link above.
2. Close all other Windows applications.
3. Double-click the installation package and follow the instructions.
For more information, see [ACL for Windows Installation and Activation Guide](#)

Activation / Other Info
After you have installed ACL for Windows, you need to activate it using your ACL user ID and password.
The activation assigns one of your organization's subscription licenses to you.

Installing ACL Direct Link
Direct Link requires that ACL Analytics and the SAP GUI are already installed on your computer.
For help with the installation, see [Installing Direct Link](#)

Install to the machine

The screenshot shows the ACL for Windows installation page. The main page has a header with the ACL logo and navigation tabs for 'ACL for Windows' and 'Add-in for Excel'. The main content area features a large heading 'ACL for Windows' with a sub-heading 'Connect to any data, analyze any risk and visualize your results'. Below this is a paragraph describing the tool and a 'Download Version 13.0.1' button. A 'Patch available for ACL for Windows' section is also visible. A red-bordered window titled 'ACL for Windows Non-Unicode - Setup' is overlaid on the page. This window shows the 'Destination Folder' section with two folders: 'Install ACL for Windows to:' (C:\Program Files (x86)\ACL Software\ACL for Windows 13\), 'Install Sample Data Files to:' (\\Mac\home\Documents\ACL Data\Sample Data Files\), and a note that the second folder will also be the default working directory. At the bottom of the window are '< Back' and 'Next >' buttons. Two red arrows point to the 'Next >' button and the text 'Leave the Defaults' in a red box. The bottom of the page is a dark blue footer with three sections: 'Instructions', 'Activation / Other Info', and 'Installing ACL Direct Link'.

Install Excel Add-In

Step 1: Install the ACL Program

The screenshot displays the ACL program interface for Temple University - EDUC. The page is divided into several sections:

- Header:** Temple University - EDUC logo and an Options dropdown menu.
- Your ACL Subscription Includes Results Lite:** A section with a circular image of people reviewing documents. Text: "Results Lite makes your analytics program collaborative. Share your discoveries in beautiful visual storyboards. Trigger surveys & follow up questionnaires when Analytics results are identified. The best part: the people responding don't need to log-in." Below this are two buttons: "Launch Results Lite" and "Learn more".
- Downloads & Mobile Apps:** A grid of download options:
 - ACL for Windows:** Upgrade to v13.0.1. Create data analytics that integrate with the entire ACL platform.
 - iOS App:** Advanced mobile capabilities for ACL GRC on iOS devices.
 - Analytics Exchange:** Sustainable, production-scale data analytics platform for Windows Server.
 - Android App:** Advanced mobile capabilities for ACL GRC on Android devices.
 - Add-in for Excel:** Investigate data by integrating ACL with Microsoft Excel. This item is highlighted with a red box and a red arrow pointing to it with the text "Click Here".
 - Premium Analysis Apps:** Get insight into process health, compliance risk, and financial exposure with pre-built analytic scripts.
- Content & Community:** A vertical list of resources:
 - Peer Community:** Connect with your peers, ask questions, and suggest product ideas.
 - Tools & Templates:** Accelerate success through content and templates for your audit, risk, and compliance programs.
 - Training:** Explore online courses and training content through ACL Academy.
 - Help Docs:** Access quick starts and user guides.
 - Tech Support:** Contact our Support team with questions or issues.

Installing the Add-In for Microsoft[®] Excel

Before installing, ensure you already have Microsoft[®] Excel installed and if you want to connect to your Analytics Exchange server you will need to get the server connection information from your Analytics Exchange administrator before starting the installer.

To install the add-in on your machine:

1. Download the Add-In for Excel installation package by clicking the link above.
2. Close all other Windows applications.
3. Double-click the installation package and follow instructions. Ensure the "Skip Settings" is not selected during install if you wish to configure access your Analytics Exchange server.

Run the installer

The screenshot shows the ACL website interface for the 'Add-in for Microsoft Excel'. The page features a navigation bar with 'ACL for Windows' and 'Add-in for Excel' tabs. The main content area includes a title 'Add-in for Microsoft Excel', a description: 'Upgrade Excel with powerful audit and investigation functionality and directly integrate it with ACL products.', and a 'Download Version 13' button. Below the button, it specifies '82.8 MB | 2017-11-14'. A section titled 'Installing the Add-In for Microsoft Excel' provides instructions: 'Before installing, ensure you already have Microsoft Excel installed and if you want to connect to your Analytics Exchange server you will need to get the server connection information from your Analytics Exchange administrator before starting the installer.' and 'To install the add-in on your machine: 1. Download the Add-In for Excel installation package by clicking the link above. 2. Close all other Windows applications. 3. Double-click the installation package and follow instructions. Ensure the "Skip'.

At the bottom of the screenshot, a Windows file explorer dialog box is open, asking 'What do you want to do with ACLAddIn1300.exe (82.8 MB)? From: downloads.acl.com'. The 'Run' button is highlighted with a red box, and a red arrow points to it with the text 'Choose "Run"'. The dialog also shows 'Skip' and 'Cancel' options.

Download Excel Add-In

The screenshot shows the ACL website's 'Add-in for Excel' page. A 'Download' button is visible, and a 'User Account Control' dialog box is open over it. The dialog box asks for permission to allow the app to make changes to the device. The publisher is identified as 'Analytics Self-Extracting Installer' from 'ACL SERVICES LTD.'. The 'Yes' button is highlighted with a red box and a red arrow pointing to it with the text 'Click "Yes"'. Below the dialog box, the 'Installing' section provides instructions for installing the add-in on the machine.
