MIS 520 – Data Analytics for IT Auditors

Week 1: Introduction to Fraud

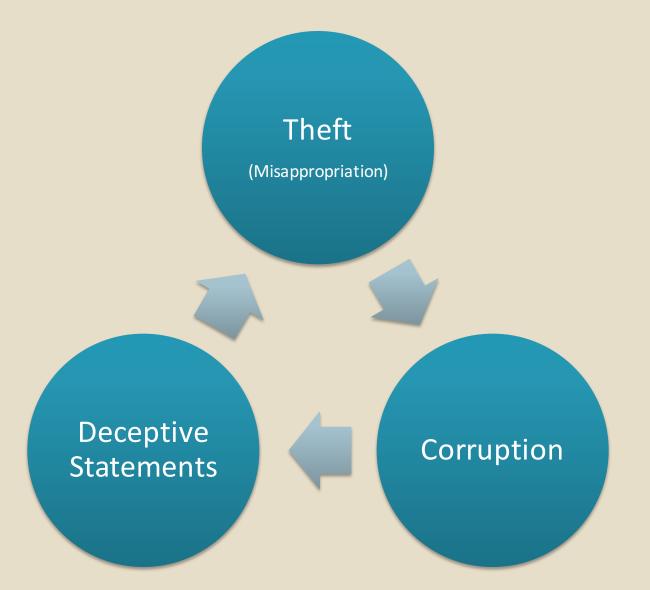

Ed Ferrara, MSIA, CISSP <u>eferrara@</u>temple.edu

The Many Faces of Fraud

Fraud

Fraud

The intent to deceive to obtain an unearned benefit.

Fraud:

- Is an illegal act or acts (intentional wrongdoing that violates a law or laws)
- Includes the concealment of the act or acts
- Results in the perpetrators gaining financial benefit from the act (monetizing the gains cash or another valuable commodity)

Examples:

- Borrowing money using someone else's identity
- Misrepresent the profitability of a publicly traded company to artificially inflate the company's stock price
- Misrepresent the profitability of a privately held company, when selling the company, to make the buyer believe the company is worth more than it actually is
- Plant small quantities of valuable ore on land for sale to deceive potential buyers about the value of the land
- Using a stolen credit card to purchase goods and or services
- Often seen in conjunction with money laundering to hide the proceeds of the fraud

Fraud Other Examples

Fraud that benefits An Organization	Fraud that harms an organization
Improper transfer pricing between related entities	Stealing money, property or falsifying financial records to cover up a theft
Intentional improper related-party transactions where one party receives some benefit not obtainable in a normal arm's length transaction.	Intentionally misrepresenting or concealing events or data
Legally transferring (assignment) fictitious or misrepresented assets or sales	Submitting claims for services or goods not actually provided by the organization.
Deliberate misrepresenting or valuing assets, liabilities or sales in a financial transaction	
Conducting business activities that violate government statutes, rules, regulations, or contracts	
Misrepresenting the financial status of an organization to outside parties by intentionally failing to disclose significant information.	

Revenues the typical organization loses to fraud each year

TENURE 7% of perpetrators committed fraud during their first year on the job. **53%** had been with their organizations for more than five years.

Money Laundering

How Do Criminals Think About Money?

- A large percentage of your money (wealth) is illegal
- The government will seize this money (wealth) if detected and caught
- Therefore criminals need to:
 - Hide their wealth
 - Transport / Transfer in order to hide
 - Transform the wealth from illegally sourced funds to legally sourced funds
 - Enjoy

Fraud vs. Money Laundering

Fraud

- Secure cash or property under false pretenses
- Companies or individuals that are victims of fraud incur financial losses.

Money Laundering

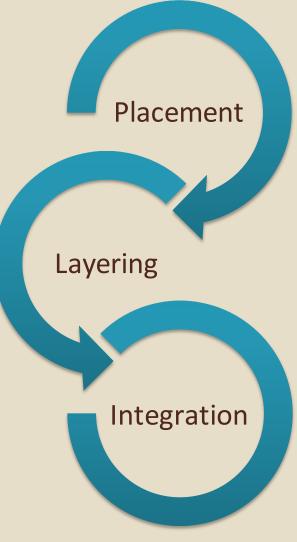

- Companies or individuals the launder money do not incur financial losses
- Money laundering separates the source of the cash
- Loss is only experienced if the government seizes funds due to illegal activity

Money Laundering

An estimated 900 billion to 1 trillion US dollars of illicit funds circulating worldwide Approximately 500 to 600 billion US dollars associated with the drug trade About 300 billion US dollars associated with United States drug sales.

Aggregate money laundering is estimated to be 2% to 5% of the world's gross domestic product (GDP)

Physical introduction of bulk cash into the financial system – cash deposits, and cash equivalent purchases – currency smuggling

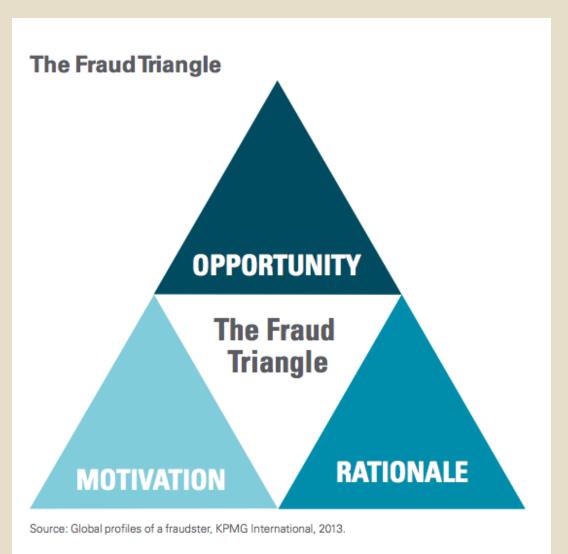

Separating the proceeds of criminal activity for their source through complex layers of transactions – using more than one financial institution – obscuring the audit trail

Placing the laundered funds back into the economy – entering as apparently legitimate funds. Accomplished through real-estate purchases, shell companies, and securities investments.

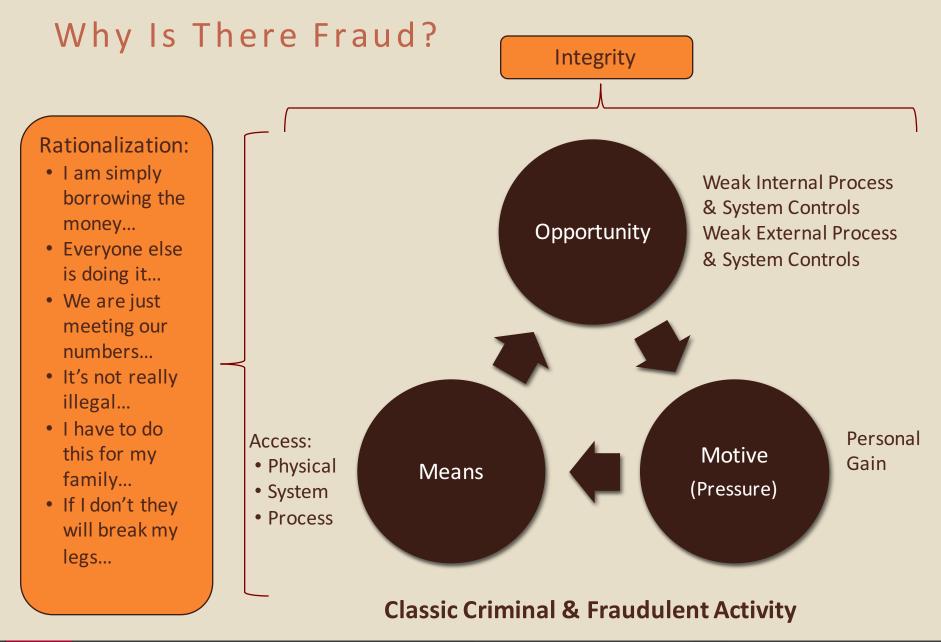

Odeh, Ismail A. (2010-08-24). Anti-Money Laundering and Combating Terrorist Financing for Financial Institutions (p. 4). Dorrance Publishing Co. Inc.. Kindle Edition.

The Fraud Triangle

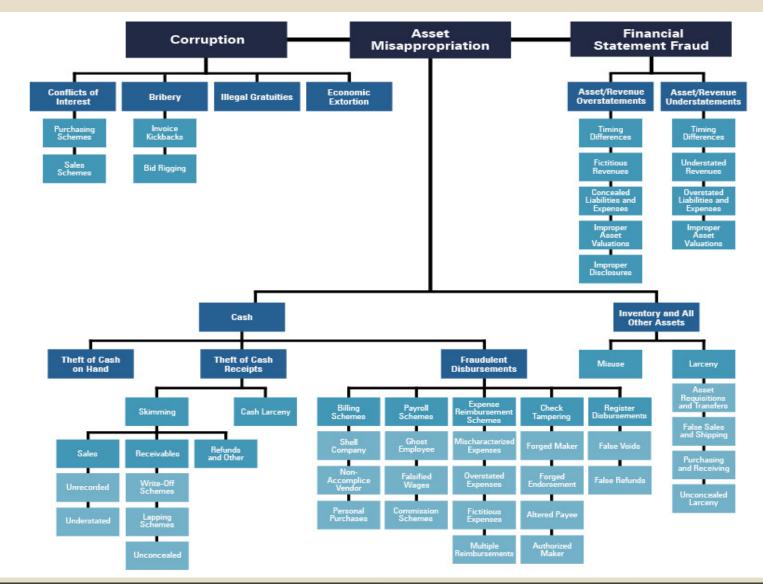

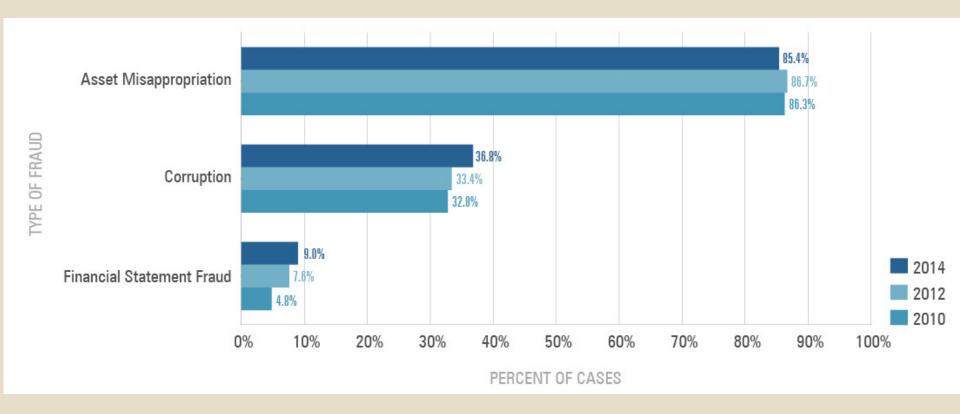

How Occupational Fraud is Committed

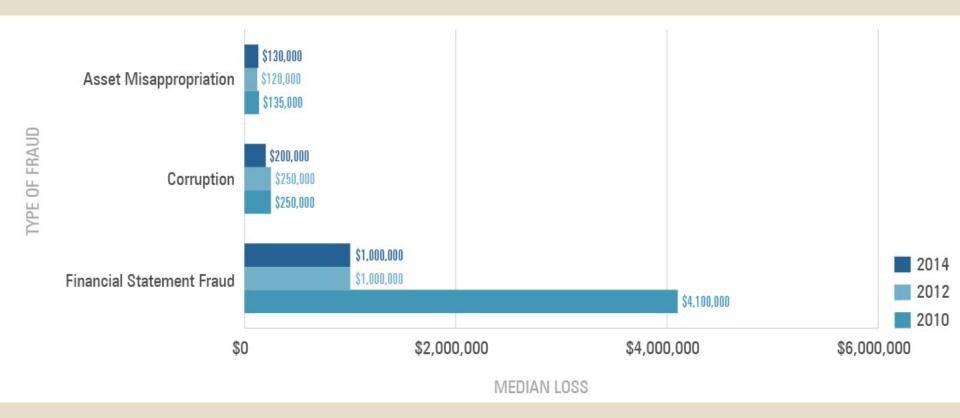

Occupational Fraud – Percentage of Cases

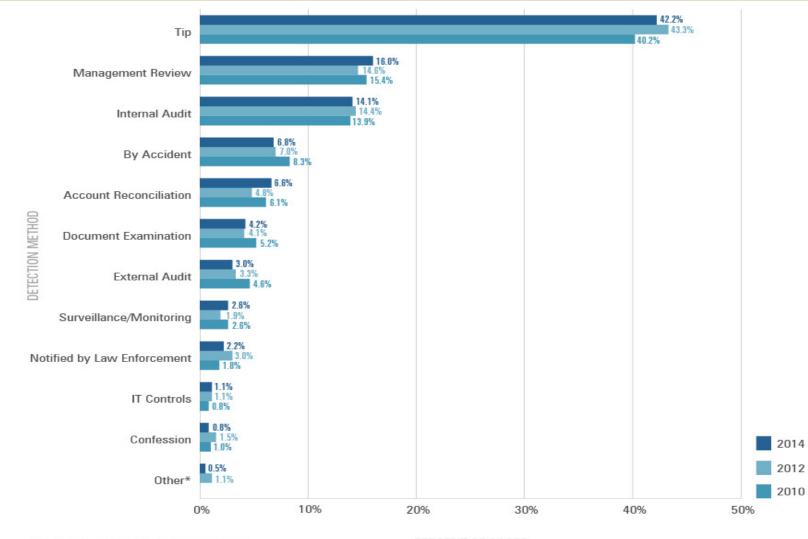

Occupational Fraud – Median Loss

Occupational Fraud – Initial Detection

*"Other" category was not included in the 2010 Report.

UNIVERSITY

PERCENT OF CASES

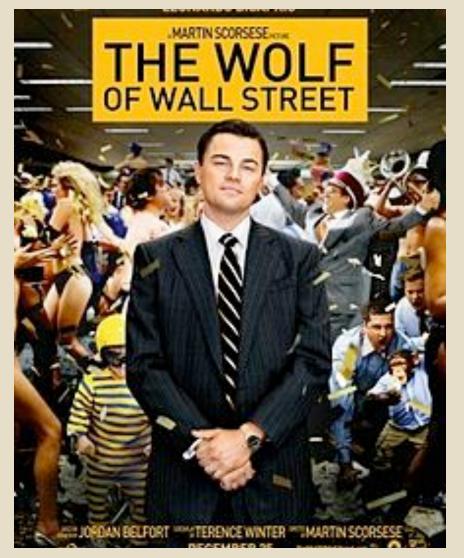

Responsibility for Fraud Detection (RACI)

Responsible	Accountable	Consulted	Informed
Internal Audit External Audit	Executive Management	Legal Counsel Enterprise Risk Line Management	Interested parties (e.g. shareholders, governmental regulators, etc.)

Concept	Definition
Responsible	The person or group that does the work
Accountable	The person or group that gets fired if something goes wrong
Consulted	The person or group that is asked for their opinion and guidance
Informed	The person or group that is informed of the issue

Securities Fraud

UNIVERSITY

- Penny stock fraud
- Stock price rises due to broker buying the stock artificially inflating the price
- Using false reporting and manipulative business activities
- <u>http://www.fbi.gov/cleveland/press-</u> releases/2014/penny-stock-fraud-netsmillions
- <u>http://www.wsj.com/articles/sec-charges-</u> <u>two-with-penny-stock-fraud-1405716923</u>

Cyber Fraud – Financial Service Company

Rationalization	Opportunity	Motive (Pressure)	Means
If I don't do this they are going to break my legs or worse.	Custodian had physical access to the bank funds transfer room.	Gambling indebtedness to organized crime	Poor physical, process and system controls
