# AIS TD Virtual Workshop 3: Installation Instruction - **Visual Studio Code**

*Note: For the folks who are taking or already took MIS 2101, MIS 2402, or MIS 3502, you should already have Visual Studio Code (VS Code) installed on your laptop/desktop/computer. Thus, you can skip this installation instruction!

Pre-Installation Information

What is VS Code?

- Visual Studio Code is a source-code editor developed by Microsoft for Windows, Linux and macOS.
- It combines the simplicity of a source code editor with powerful developer tooling → and thus, it is suitable for developers ranging from beginners to experts!

What programming languages are we focusing on during this workshop?

- Three languages we want to look at for this workshop are HTML, CSS, and Javascript.
- Since the topic is Website Accessibility, HTML is the one we will focus more on!

Notes:

- If you have any questions or issues in installing VSCode, please contact:
  - Nhi at nhi@temple.edu
  - Michelle at michelle.purnama@temple.edu

- Or you could visit our AIS Virtual Helpdesk!

Installation Instruction

VS Code is actually pretty straightforward to download and install! So we hope nobody get stuck or anything :)

1) For MAC Users :

Please follow the instructions on this page to download VS Code for macOS: [VS Code on macOS.](#)

2) For Windows Users:

Please follow the instructions on this page to download VS Code for Windows: [VS Code on Windows.](#)
