

Nicholas Gormley
Sharepoint FRP
April 27,2017

Introducing the team collaboration software, Sharepoint, can increase our company's revenue by \$1,864,250 a year. This increased revenue comes from utilizing Sharepoint's collaboration system, reducing our PMP's time spent managing documents and increasing our PMP's billable hours.

Microsoft Sharepoint will allow our PMPs to create, upload, or edit their files from anywhere. In addition to unrestricted access, PMPs can easily share documents with each other or clients, eliminating the possibility of duplicate documents. Sharepoint allows document collaboration in real time, reducing the hours spent on document managing and time spent with clients. These hours may now be utilized by our PMPs as billable hours, increasing the number from 1500 to 1900 per PMP.

Sharepoint has a total cost of \$253,750 over a three-year period, including costs from hardware, maintenance, and support costs. After implementation of Sharepoint, we will see an increase of our revenue by \$648,750 a year. The three-year net benefit will be \$1,864,250.
