

Job Description

Economist

Economists study the production and distribution of resources, goods, and services . They can work for either the private or public sector.

Business Management Analyst

Management Analysts propose ways to improve an organization's efficiency. They advise managers on how to make organizations more profitable through reduced costs and increased revenues.

Economic Development Planners

Urban and regional planners develop plans and programs for the use of land. They use planning to create communities, accommodate growth, or revitalize physical facilities in towns, cities, counties, and metropolitan areas.

Financial Analyst

Financial analysts provide guidance to businesses and individuals making investment decisions. They assess the performance of stocks, bonds, and other types of investments

Health Services Managers

Medical and health services managers, also called healthcare executives or healthcare administrators, plan, direct, and coordinate medical and health services. They might manage an entire facility, specialize in managing a specific clinical area or department, or manage a medical practice for a group of physicians

Human Resources Administrator

Human resources managers plan, direct, and coordinate the administrative functions of an organization. They oversee the recruiting, interviewing, and hiring of new staff; consult with top executives on strategic planning; and serve as a link between an organization's management and its employees.

International Trade Specialists demonstrate a basic knowledge and understanding of the commercial movement of goods and services, including the processes of international commerce; underlying financial and tariff structures; the promotion and facilitation of exporting; foreign market research and development; import/export laws and controls; or related activities/

International Trade Specialist

Lawyers advise and represent individuals, businesses, or government agencies on legal issues or disputes.

Lawyer

Market research analysts study market conditions in local, regional, or national areas to examine potential sales of a product or service. They help companies understand what products people want, who will buy them, and at what price.

Market Research Analyst

Personal financial advisors give financial advice to people. They help with investments, taxes, and insurance decisions.

Personal Finance Advisor

Helps customers reach their personal and financial goal through homeownership

Mortgage Consultant

Loan Specialist
