SharePoint

Switching our company to a SharePoint platform will enable employees to be more productive, and efficient, and create a \$1.84 million net benefit over the three-year investment period. SharePoint

facilitates rapid document sharing, communication, and collaboration between clients and employees

by providing a central portal for resources all by accessing these resources online through a central secure location. Through greater efficiency and

technology with SharePoint, our PMPs will be able to spend 400 hours more working for and creating

value for the client, while bolstering our bottom line through 3810 more billable hours.

SharePoint is framework built by Microsoft to be an integrated suite of web applications designed with document and file management, and collaboration. Currently our employees are spending a lot of time managing multiple versions of documents, and even more collaborating internally, and negotiating

client contracts. With SharePoint at the center of our organization, this process can be made much

quicker. (SharePoint enables us to... For Example, when a PMP has a proposal they can post it on the internal SharePoint site. In

real-time, other members of the team can edit the document for all others to see. Once ready for review

by the client, they can request any changes, and again in real time see those changes made. When all

parties are satisfied, the contract can be finalized and what previously had taken weeks can now be

done in days.

SharePoint implementing sharepoint will allow PMPs to gain 400 billable hours per year, resulting in 3810 total increased revenue of additional billable hours

create over 3810 more billable hours all the while having a 1 year return on investment. By purchasing,

SharePoint at an initial cost of \$100,000 and \$54,000 in maintenance over 3 years, our revenue will

increase from \$7.88 million to \$9.72 million over the 3 year investment period. Through the transition to

SharePoint, our company will experience greater efficiency, collaboration, and realize a net benefit of

\$1.846 million from this project.
