Steve Martorelli

SharePoint

Our company has the opportunity to earn $1,846,250 by investing in SharePoint. SharePoint is a multipurpose set of web tools that will enable our project managers to easily collaborate on projects on any device, increasing productivity and generating more revenue.

With the implementation of SharePoint, our company will see a significant increase in productivity within our project managers, thus creating more value for our customers. SharePoint is a multipurpose set of web technologies backed by a technical infrastructure. SharePoint will allow us to consolidate our intranet, extranet, and Internet sites all on a single platform. With the consolidation into a single platform our PMP's will be able to access this information on almost any device. SharePoint is a stand-alone platform that creates a single place for all documents used to be stored, organized, shared, and accessed easily improving productivity.

By implementing SharePoint, it will cost our company a one-time investment of $100,000 and $51,250 in annual maintenance. SharePoint is going to increase our billing hours by 400 a year per employee. SharePoint will help improve our productivity and show a net benefit of $1,846,250 over three years. With the execution of SharePoint our PMP's will be able to spend more time with our clients generating more revenue.

TO BE RETURN:				
	year 1	year 2	year 3	TOTAL
SharePoint (hardware) @ $100,000	-100,000			-100,000
