

SUMMARY:

I'm seeking an opportunity as an Information Technologist and Health IT in a dynamic organization where my skills will be fully utilized. Self-reliant, proactive, and customer-oriented IT professional with sharpened skills in Information Science and Management Information Systems. Strong knowledge of mobile and fixed networks, including communication, IT network architecture, and in-network and service security, to support the cyber security team. Phenomenal communicator with expertise in scripting and coding, maintaining, and hardening critical services of healthcare systems, fixing vulnerabilities, and removing malware. Aptitude and oversight for perplexing, cross-domain, heterogeneous classified networked environments, and ability to maintain high standards of performance in the job role, excellent time management, and organizational skills, finding vulnerabilities in Web and mobile applications that are restricted due to privacy concerns.
