

5202 Spring 2016 Project Teams

You will be picking your own teams for your projects this semester. I find that the best teams are diverse in the backgrounds of their members. I suggest that you strive to have both working and full-time student members, domestic and international members, and more technical/less technical members. If you set up your team this way, you will find that you can support each other.

Here is a list of everyone in our class and their email:
