EXPERIENCE

BAKER TILLY US, Philadelphia, PA

June 2023

Intern, Now for Tomorrow Rotational Internship

- Gained comprehensive knowledge of tax, audit, and consulting industry, as well as best practices through hands-on observation of daily operations and strategic decision-making processes for a public accounting and consulting firm
- Assumed role of a strategic advisor within a cross-functional team, collaboratively addressing challenges of belonging in the workplace
- Employed data-driven decision-making and conducted in-depth interviews with employees to identify core issues, facilitating the development of tailored mentorship and learning programs

KPMG, Virtual Remote

March 2023

Intern, Data Analytics Consulting Virtual Internship

- Acquired valuable insight through self-directed learning to solve tasks encompassing data quality assessment and customer behavior analysis
- Identified missing values, inconsistencies, and duplications in a sample dataset using Excel, then analyzed data using pivot tables/formulas, and recorded insights
- Utilized data to mitigate existing data quality concerns and organized strategies in a presentation

PANERA BREAD, Philadelphia, PA

April 2021 – December 2022

Team Lead

- Oversaw daily operations while managing inventory, income, and financial transactions at a dining establishment
- Supported staff with food preparation, maintained a productive workspace ensuring high quality customer service
- Supervised 7 employees daily and trained 3 new hires every month

ACTIVITIES

Member, Association for Management Information Systems

January 2023 – Present

Member, South Asian Student Society

August 2021 – Present

PROJECTS

Belonging Case Study, Baker Tilly US

June 2023

- Assumed role of strategic advisor to foster a sense of belonging at sample company A due to lack of inclusion
- Created comprehensive strategies, including the establishment of Employee Resource Groups (ERGs), non-discrimination policies, and sensitivity trainings

Engineers Without Borders, Engineering & Engineering Tech

August 2021 – December 2021

- Collaborated with a team of 5 to fabricate an effective supply transportation method for residents in Cape York, a place accompanied by harsh environmental conditions
- Developed multi-criteria analysis via Excel to identify the most effective solution, a specialized drone design
