EXPERIENCE

Data Analyst Intern — The Global Tech Experience, Remote

June 2023 - August 2023

- Gained valuable industry insights and hands-on experience in a fast-paced technology environment.
- Collaborated on diverse projects, contributing to team efforts and delivering on project goals within tight deadlines
- Intel Sustainability Project -Led data analysis for Intel's sustainability project, identifying the Northwestern region as the prime location for a new data center due to its strong renewable energy infrastructure, accounting for 41% of its energy output, with a net production of 21,685,235. This analysis validated the region's superiority in sustainability metrics, aligning with Intel's environmental objectives.
