Graduation: June 2026

Major: Management Information Systems | Minor: | GPA:

Selected Courses: Marketing Management, Macroeconomics, Microeconomics, Quantitative Methods for Business, Quantitative Methods for Business II.

ACTIVITIES

Member, Temple Association of Information Systems

EXPERIENCE

Hydro North America, Cressona, PA

July 2023 – August 2023

Extruder A, Extrusion

- Extruder A at Hydro performs many tasks throughout the company. In the extrusion department, my key role was quality control, I checked that the aluminum extrusions were within a customer’s specifications. Hydro is a world-leading aluminum extrusion business, with around 100 production sites in 40 countries. Hydro has a little more than 1,400 people employed at the Cressona location I worked at, and around 30,000 total people employed worldwide.
- I was mainly on Press 1, which produces Tesla battery cases, and the frame for Ford trucks.
- Some of the actions I performed within the company would consist of checking extruded aluminum for defects such as water marks, dents, or the measurements not matching up with the order specifications.
- I was incredibly careful when checking the metal for defects because you do not want to ship a defected piece of metal to a customer.
- Some of the strengths I learned from working at Hydro over the summer is that I gained patience and realized how important quality is to a company, along with their reputation.
