Extra Credit and PRO points
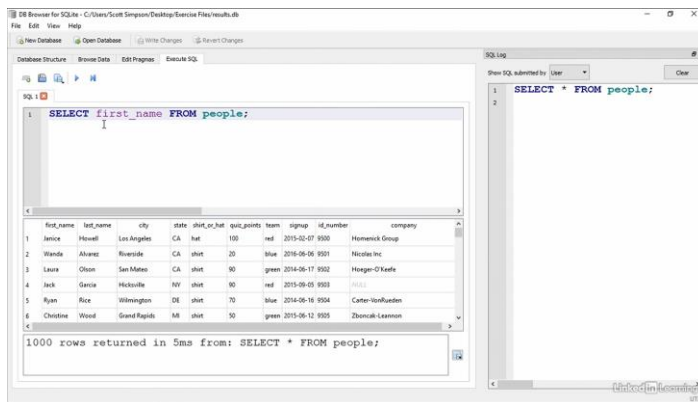

For MIS2502, Section 3, Shafer Spring 2023

How can I earn extra credit and/or PRO points in your class?

First, if you don't have a LinkedIn.com account, you should go make one.
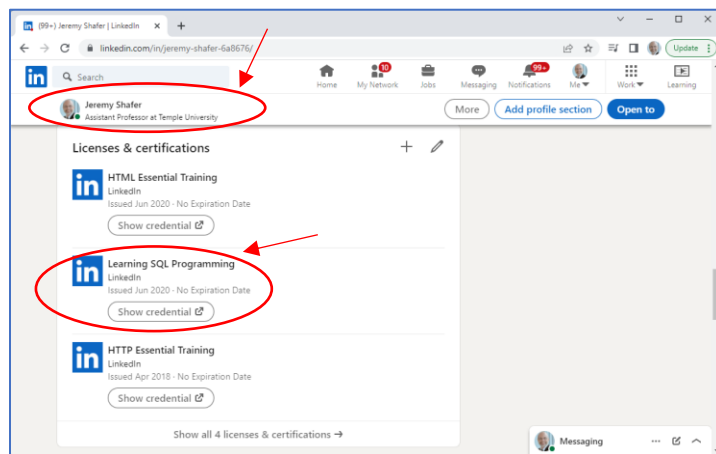

Next, sign in to LinkedInLearning.temple.edu. Then, watch this video: **Learning SQL Programming (March 2021) with Scott Simpson**. Students should not merely watch the video like it's an episode of Breaking Bad. Instead, students should follow along using the software recommended in the video.

The software looks like this:

When you are done watching the video, post the video to your LinkedIn account so that it appears under the skills listed in your LinkedIn profile. Take a screenshot of that. The screenshot should clearly display your name, and your completion of the video.

For example:

OK… what's next?

- **All students** are eligible to receive extra credit on exam 3. There will be 5 extra credit bonus questions on exam 3, worth 2 points each. Students will earn 2 points of extra credit for each correct answer. Students may receive a maximum of 10 points extra credit on exam 3.
The bonus questions will be very direct and based on the material in the Scott Simpson LinkedInLearning video.
If you are not an MIS major, that is all you need to know.

- **MIS Majors** can receive 50 PRO points. To earn the points, you need to:
  1. Watch the video
  2. Upload your LinkedIn screenshot to canvas under the "MIS PRO Point Screenshot" Assignment
  3. Answer *all five* bonus questions correctly on exam day

- I will notify MIS students who are eligible to receive the PRO Points. **After** you receive my notification, you must formally request your points on the MIS Community site. Directions for doing that are here:
https://community.mis.temple.edu/professionalachievement/request-points
