

Design Thinking

MIS3506 * Lavin * Fall 2022

The goal of design "process"

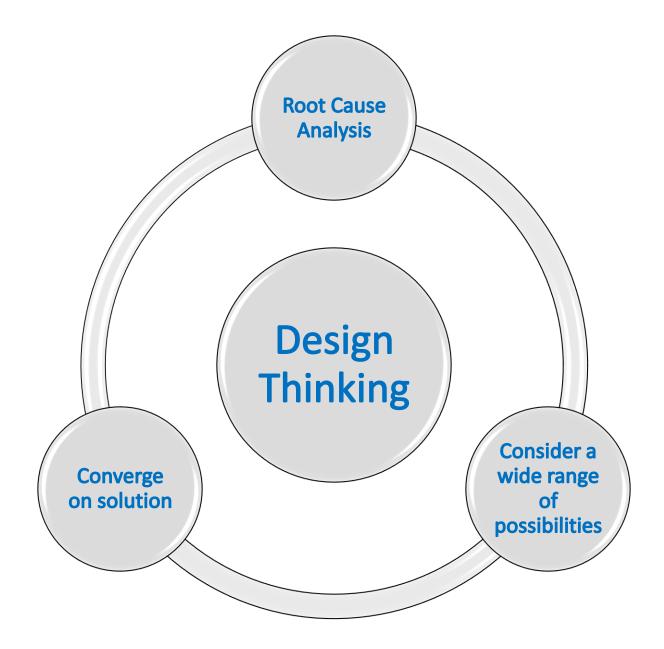

User Insights

Insert Magical Process Here Great Experience, Successful Product

Source: Whalen

What Drives Design?

It is amazing how often people solve the problem before them without bothering to question it. (Norman p. 217)

Good designers first understand the real issue

Driven by many things

Why do we make products?

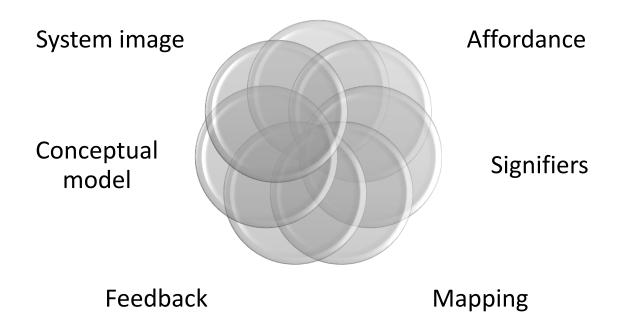

Human Centered Design

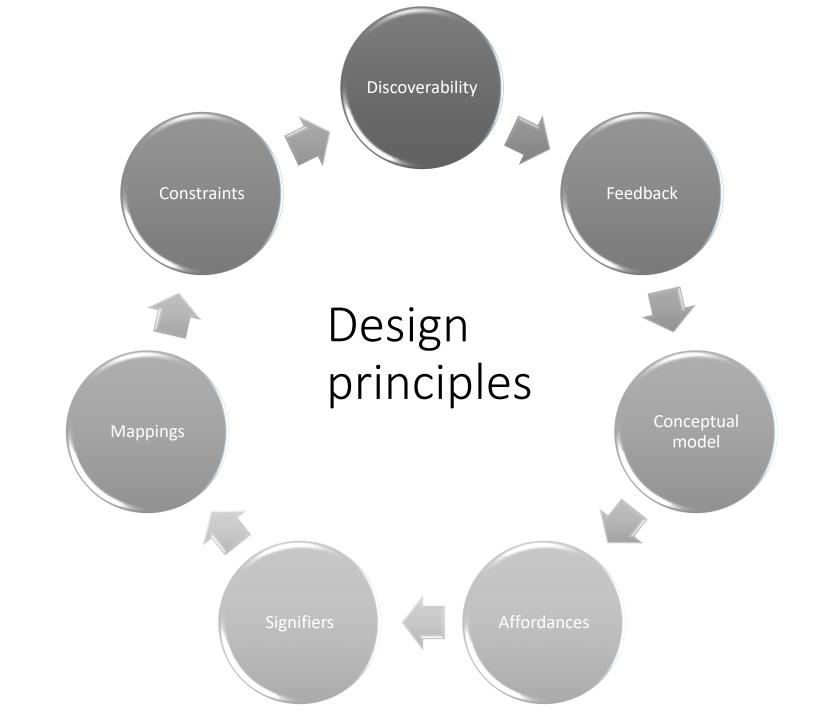

- Focus on human needs, desires, capabilities
- Ensure that people's needs are met
- Usable and understandable products
- Accomplishes desired tasks
- Experience is positive & enjoyable

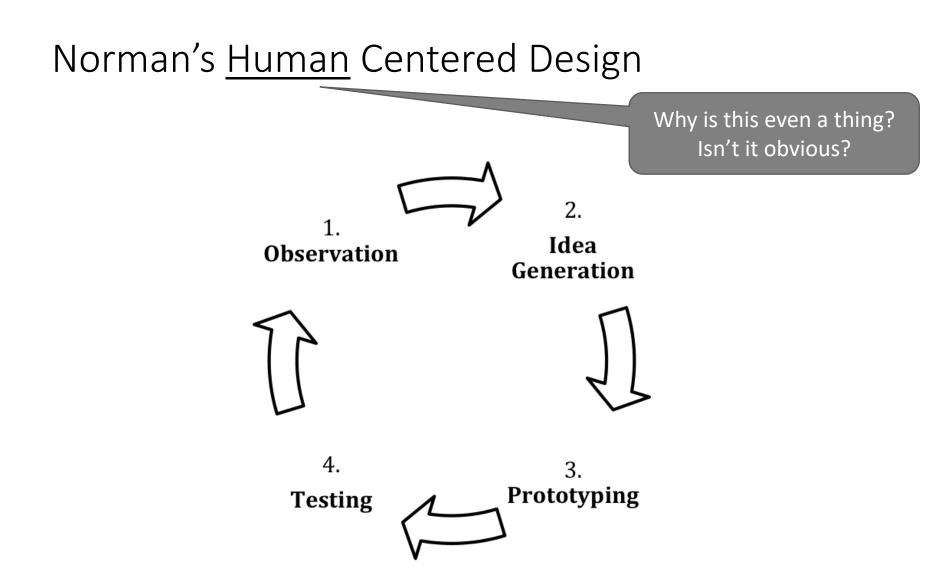

The world according to Norman

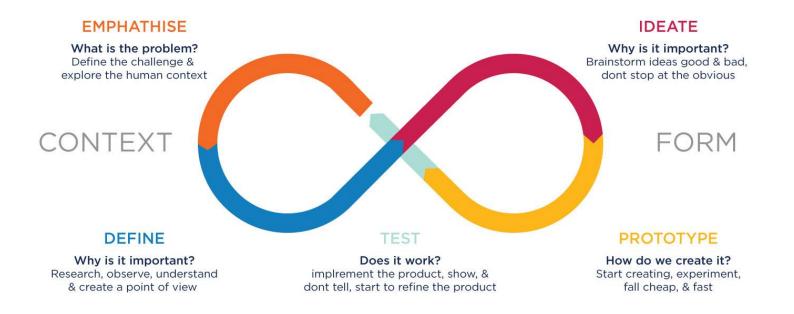

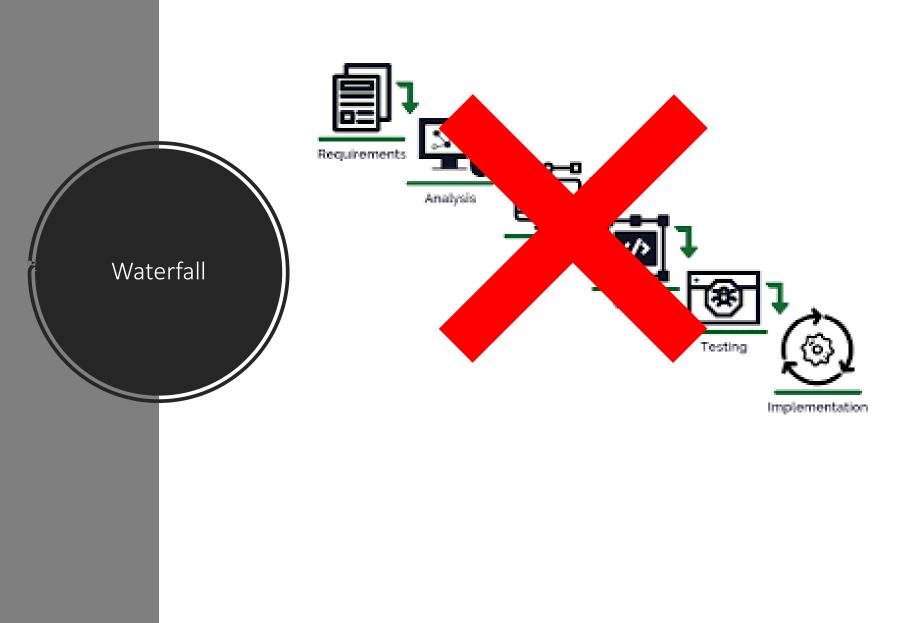

Is this applicable in today's APP centric 'lets make the users do the work' world?

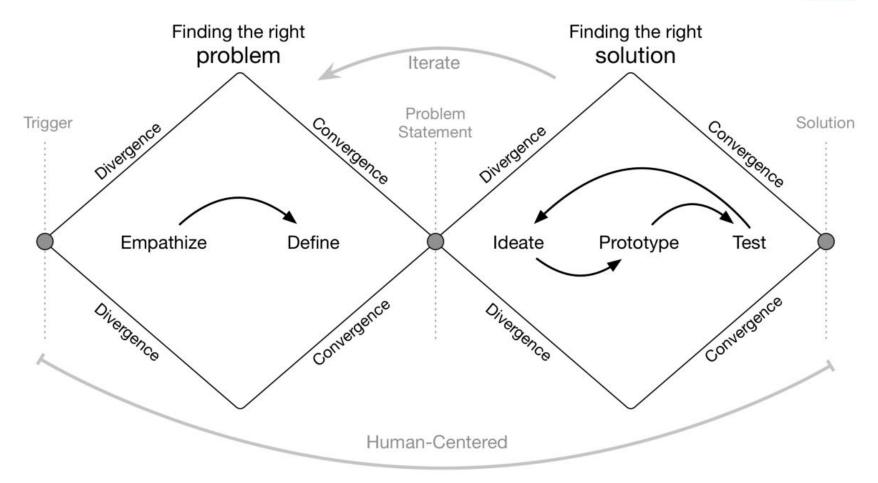

DESIGN THINKING A FRAMEWORK FOR INNOVATION

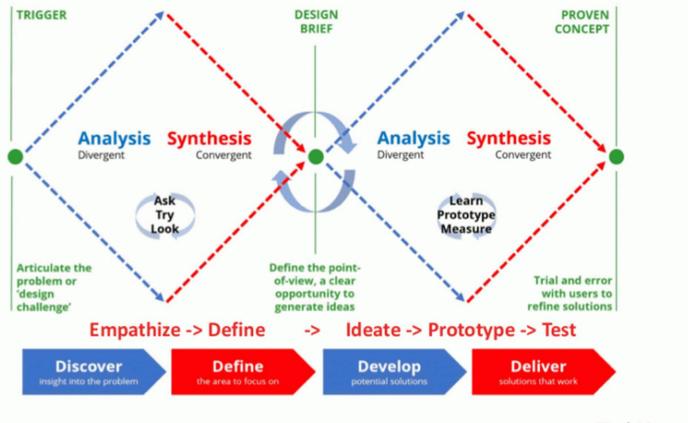

The New Double Diamond Model of Design Thinking

TechLive+ Fabrique

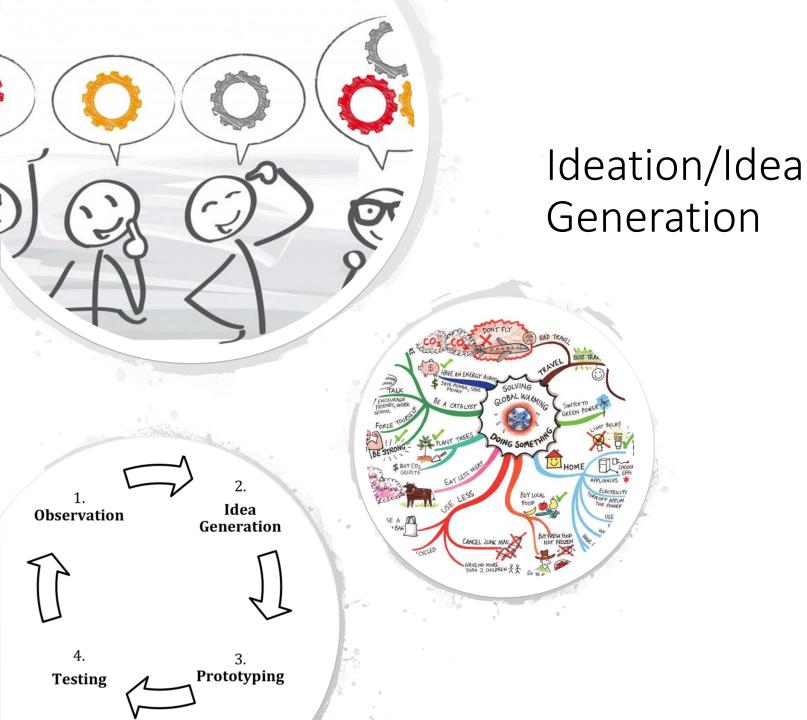

Effective design satisfies

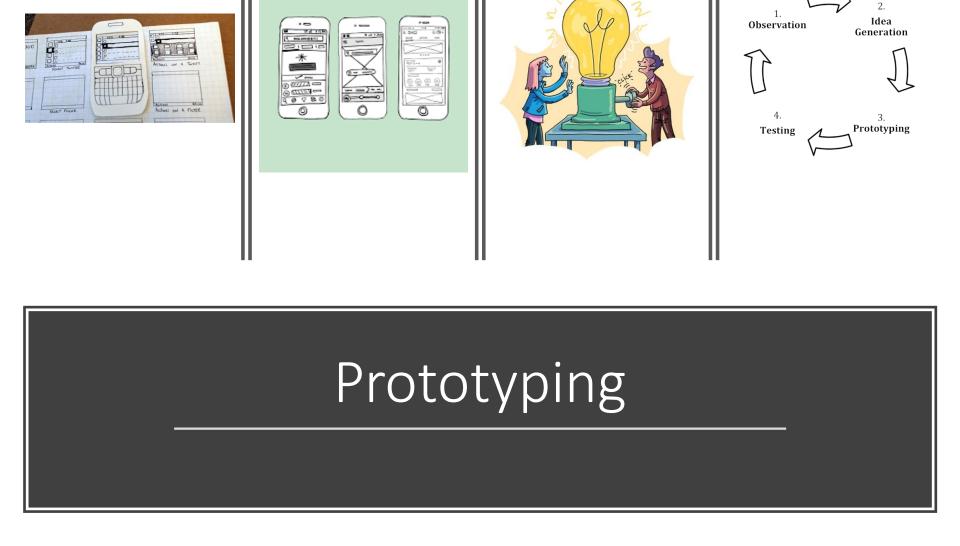

- Shape and form
- Cost and efficiency
- Reliability
- Effectiveness
- Understandability & usability
- Please of appearance
- Joy of Actual Use
- Pride of Ownership

Observation

- Research the people and how they use the system
- Understand interests, true needs, motivations
- Natural environment

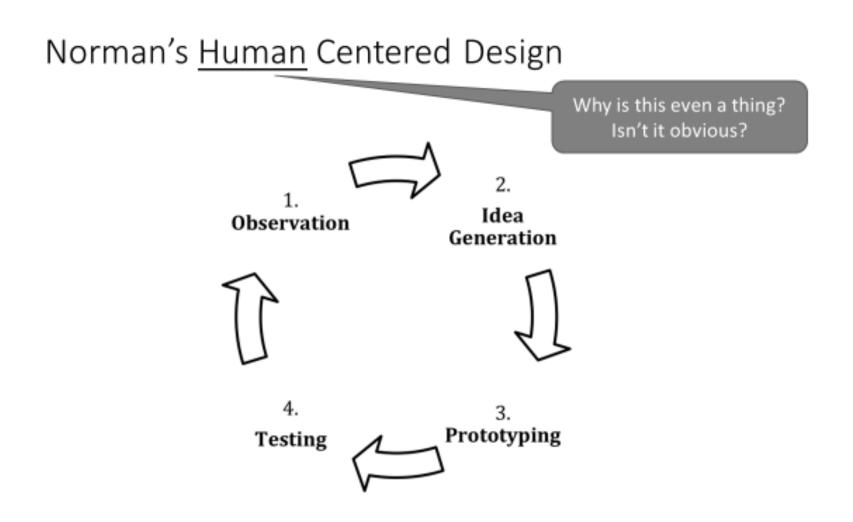

NWW

2. 1. Observation Idea Generation Testing 4. Testing 3. Prototyping 11

Iteration

- Requirements are determined by watching people in their natural environments
 - People can't always voice their needs
 - Repeated study and testing!
 - Each cycle removes the fog, gain more clarity
 - When does it end? It depends!

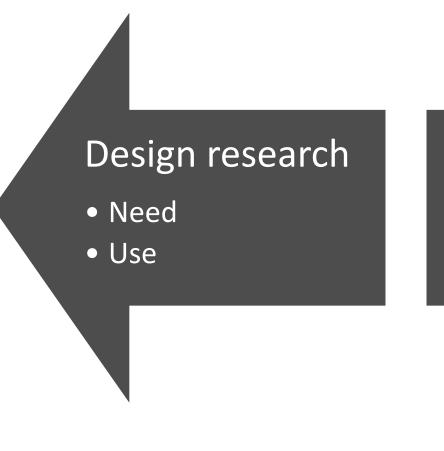

Is this applicable in today's APP centric 'lets make the users do the work' world?

ACD & Tasks vs. Activities

- Design for the Activity the task is the support!
- Focusing on specific tasks is too limiting what do you want

Market research

- Want
- Buy

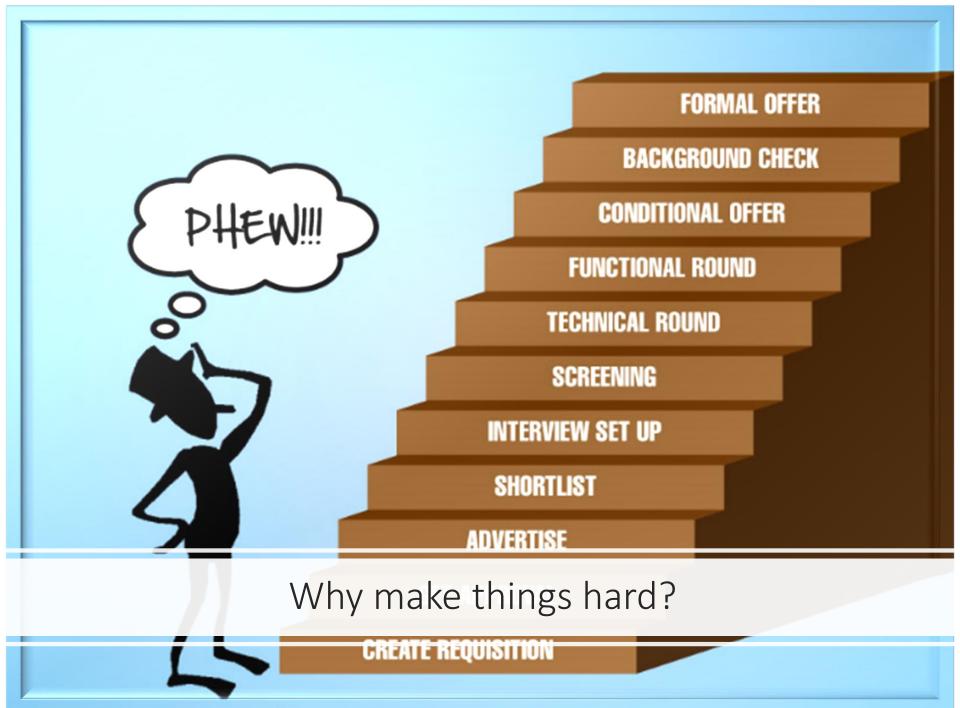

A very old saw to grind – design vs. marketing

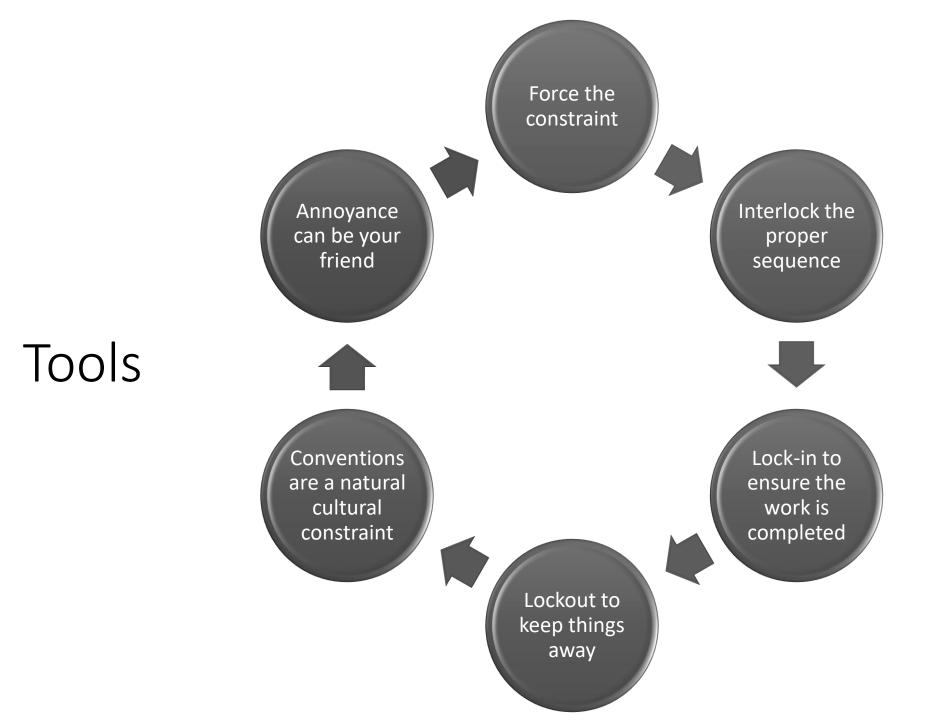

According to Spock

Need vs. want

Do you love or hate standards?

"Human Interface Guidelines"

Modal Sheets

A custom modal sheet is a full-screen view that slides over your app's current screen. Use this type of sheet when you want to present a custom interface modally. The top-left corner of the modal sheet is reserved for the Close button, which dismisses the interface. The Close button is always white.

Retitle the Close button if doing so makes sense. Apple Watch supplies a default title for the Close button, but you can change it to convey a different meaning. The most common alternate titles for this button are Done and Dismiss. Don't use "Back" or "<" in the Close button title. You don't want your custom Close button title to mislead users into thinking that the sheet is part of a hierarchical navigation interface.

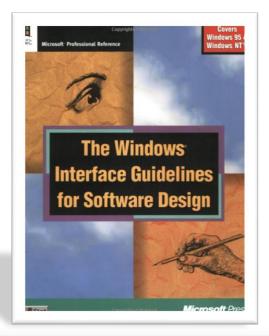

Don't use the Close button to title the page. If the Close button looks like a page or an app title, or if its title is empty, users won't know how to dismiss the modal sheet.

Avoid displaying a second modal sheet from an existing modal sheet. When users close a modal sheet, they expect to return to the main app interface.

And more...

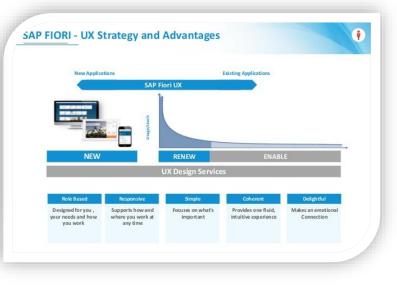

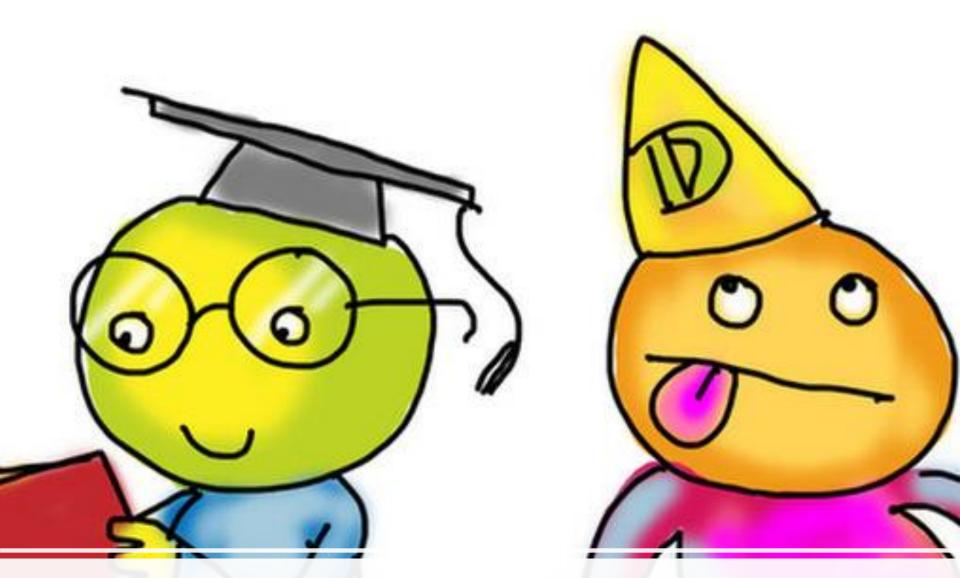

SAP Fiori for iOS

The iOS platform is one of the most advanced mobile platforms with the best native experience. It is only natural to unify the familiar experience of iOS with the best enterprise user experience of SAP Fiori.

I am not stupid eh no. I want to be stupid
