BRIDGE OF EVALUATION

WORLD

OVERVIEW:

Gulf of Expectation vs. Evaluation

Watch Video: <https://www.youtube.com/watch?v=bg4UwyPPZ6U>

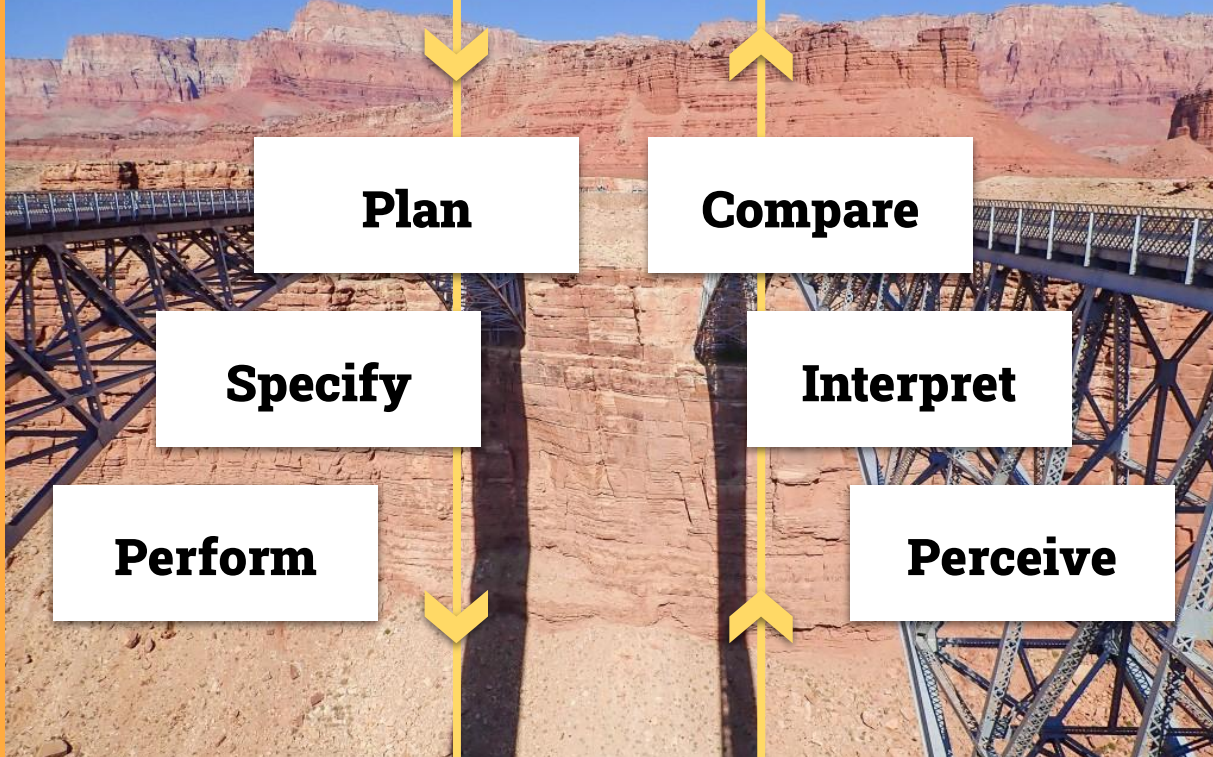

Why Should We Care About this?

The Goal of UX designers is to make it as easy as possible to do something with the least amount of actions.

Question?

How many steps does it take to delete an email?

BRIDGE OF EXECUTION

BRIDGE OF EVALUATION

7 Stages of Action

GOAL 1. Form the goal of what you want to do

PLAN 2. Make a plan of what you will do

SPECIFY 3. What action sequence you will perform

PERFORM 4. The action sequence

PERCEIVE 5. The state of the world (assess where you are)

INTERPRET 6. Analyze and interpret things

COMPARE 7. The outcome (where you are at) with the goal

EXAMPLE:

7 Stages of Deleting an Email

GOAL 1. I would like to get rid of the emails that I don't need.

PLAN 2. I would like to delete these emails.

SPECIFY 3. I can tap on the item, or I can tap on the checkbox.

PERFORM 4. I want to tap on delete icon.

PERCEIVE 5. I see a notification.

INTERPRET 6. The notification says that the mail was moved to trash.

COMPARE 7. The email was deleted.

BRIDGE OF EVALUATION

In Class Activity

Scavenger Hunt

TEXT EXAMPLES TO: [215-410-7485](tel:215-410-7485)

Break up into groups of 2 or 3

Spend 30 minutes inside or outside finding examples

- Gulf of Execution
 - Gulf of Evaluation
-

Share

- We'll come back to the group and share our examples.
- The group with the best example wins a prize!

Design Takeaways to Bridge or Shrink the Gulfs...

**Provide Visibility
of System Status**

**Meet the
Conceptual Model
of the User**

**Provide full and
continuous feedback**

**Provide good
Mapping**

**Consistency in presentation of
operations and results
through signifiers**

Part 2

Human Thought & Processing

Type of Human Thought

Subconscious

Fast, automatic, daily skilled
behavior

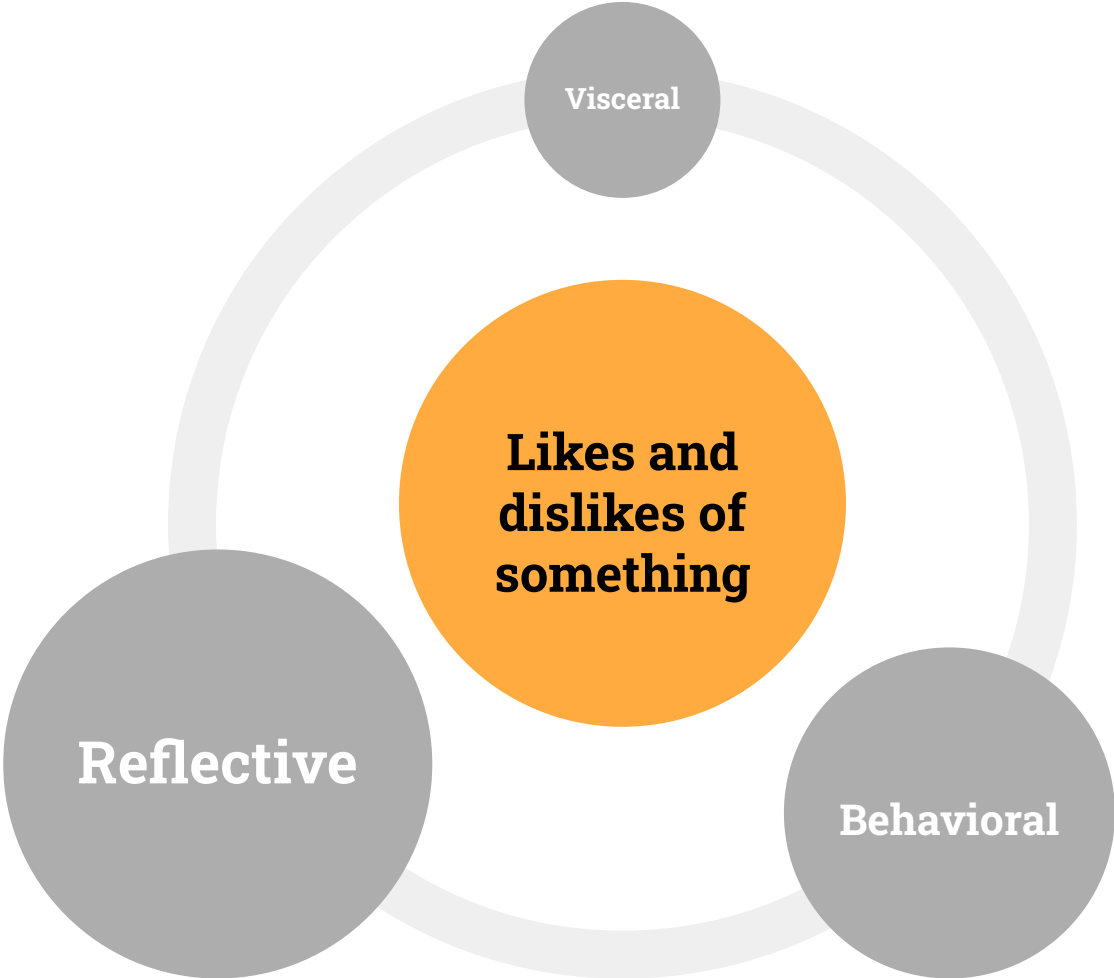

VS

Conscious

Slow, controlled, limited, infrequent

What are some examples of each?

Three Levels of Processing

Visceral

- Most basic level of processing
- Concerns itself with appearances
- Quick judgements about the environment
- Respond quickly and subconsciously – without awareness or control

This example is all about the visual quality but does not allow the user to think deeper

Behavioral

- **Pleasure and effectiveness of use**
- **Every action is associated with an expectation**
- **Practical and functional aspects of a product**
- **Designer Goals: Positive Outcome/Expectation = Positive Experience**

This example is all about function and creating easy, automatic subconscious actions for the user

Reflective

- **Conscious cognition**
- **Deep understanding**
- **Reasoning and conscious decision making**
- **Evaluation of the circumstances, assessing blame or responsibility**
- **Highest levels of emotions**

The complexity of this design allows for function, as well as a deeper level of accomplishment and pride

Seven Stages of Action & Three Levels of Processing

EXAMPLE:

Levels of processing and design

Watch Video: <https://youtu.be/RIQEoJaLQRA>

The BIG takeaway...

Remember when we are **designing products and experiences** to keep all these steps in mind to **bridge the gulfs and create pleasurable experiences** based on understanding our users.

Exam Review

Make sure you are familiar with the following...

- Normans UX Design Principles
- Design Processes
- User Testing
- User Personas
- Mistakes & Slips
- Human Centered Design Module
- The Gulfs
- Level of processing

Due Next Week...

Study for Exam 1

Reading (Due Wednesday for Class)

- ❑ Book: Norman, Chapter 2 (Finish the rest of the chapter)
- ❑ Dark patterns article

Project - Part 2 (Due Sat., Oct 1 @ 11:59 p.m.)

- ❑ Keep working on all items in part 2 with your group
