

Team Project

Context

- You and your team have volunteered to participate in a free community information security clinic (“ITACS Clinic”) and provide support to a under-served small local business
- In a prior meeting your team was introduced to a number of small businesses and community support organizations
 - At that meeting you did a great job introducing your company and the service you are offering through the clinic
 - One organization that attended the meeting has taken you up on your offer, and signed up to meet with you and receive intensive help from your team
- You will conduct your next meeting with your client during your Team Presentation
 - Your client knows who you are and there is no need to reintroduce your team during your Team Presentation

Team Project Presentation

Your Team's Mission is to deliver a presentation to your client. Prof. Lanter who will act as the owner/manager of the business. During your 15 minute presentation your team is responsible for explaining the following:

1. Information System Security

- Introduce them to "Information Security Objectives" and "Impact Ratings" of breaches
- Explain how the objectives and impacts are relevant to small businesses like theirs

2. Risk Management Process

- Describe the process you will guide them through to help them secure their information and computer systems
- Explain where they are in the process and how the homework assignment you are giving them fits in the process

3. Homework Assignment – Explain how your client should get started in the process described in 2, and what they need to work on and bring with them to your next meeting

- Provide motivation** – Why they should do their homework? What is in it for them?
- Provide details of their homework assignment (using a worked-out example or template)**– So they know how to do their homework

The team that is not presenting is responsible for:

- Listening to each presentation made by other teams*
- Asking clarifying questions of the presenting teams to identify any gaps, inconsistencies or issues in the presentation – in the 10 minutes after the presentation is over*

Deliverables

Your team will present during either Unit #14. By end of Unit #14 each student should submit to Canvas in PDF format the following:

1. Team project PowerPoint slide presentation
 - Be sure to identify: your client, your Team, and all members of your team in deliverables for both 1 & 2
2. Homework materials your team prepared for your client
 - Worked out example &/or template for your client to use in doing their homework
3. Your 360-degree review, answering the questions:
 - What you contributed to your team's project?
 - What each other member of the team contributed to the project?

Project Teams

Please examine the Team roster on the right, make sure you know which team you are on
