Case Study Analysis – Group Work

1. What information security reporting or organizational governance relationship exists between Information Security and the organization(s) Ballard and Francesco report into?

   – *Is this a problem?*

2. What evidence is the basis for Information Security Office (IS0) conclusion that the Dean's stolen laptop did not contain personally identifiable information on RIT students, faculty, or staff?

4. Is the ISO's conclusion valid? Why or why not?
