

# Team Project

## Context

- You and your team have volunteered to participate in a free community information security clinic (“ITACS Clinic”) and provide support to a under-served small business
- In a prior meeting your team was introduced to a number of small businesses and community support organizations
  - At that meeting you did a great job introducing your company and the service you are offering through the clinic
  - One organization that attended the meeting has taken you up on your offer, and signed up to meet with you and receive intensive help from your team
- You will conduct your next meeting with your client during your Team Presentation
  - Your client knows who you are and there is no need to reintroduce your team during your Team Presentation

# Team Project Presentation

Your Team's Mission is to deliver a 15-minute presentation to your client.

Prof. Lanter will act as the owner/manager of the business.

During your 15 minute presentation your team is responsible for explaining the following:

## **1. Information & Information System Security**

- Introduce them to "Information Security Objectives" and "Impact Ratings" of breaches
- Explain how the objectives and impacts are relevant to a small business like theirs

## **2. Risk Management Process**

- Introduce the process they will use to identify what to protect and how to plan the security of their information and computer systems
- Explain that their homework is the first step of the process, and how the homework assignment fits in the larger process

## **3. Homework Assignment** – Help your client understand how to take the first step and identify their information assets, and how to prioritize their assets for protection

- Provide motivation** – Explain the benefits of why they should do their homework?
- Provide details of their homework assignment (using a worked-out example or template)**– So they know how to do their homework

# Deliverables

Your team will present during Unit #8.

- By end of Unit #8 each student should submit to Canvas in PDF format the following:

1. Team project PowerPoint slide presentation

- Be sure to identify: your client, your Team, and all members of your team in deliverables for deliverables 1, 2, & 3

2. Homework materials your team prepared for your client

- Worked out example for your client to use as a template to get started doing their homework

3. Your 360-degree review, answering the questions:

- What you contributed to your team's project?
- What each other member of the team contributed to the project?

# Project Teams

*Please examine the Team roster on the right, make sure you know which team you are on*

# To get started...

1. Join your team's breakout room
2. Identify the type of small business of your client
3. Create an outline of the PowerPoint slides you will create for your presentation
4. Draft the homework example you will be giving your client
