

Team Project

Background information:

- Your team has volunteered to participate in a free community information security clinic (“ITACS Clinic”) and provide support to an under-served small local business
- In a prior meeting your team was introduced to a number of small businesses and community support organizations
 - At that meeting you did a great job introducing yourself and the service you are offering through the clinic
 - One organization that attended the meeting has taken you up on your offer, and signed up to meet with you and receive intensive help from your team
- You will conduct your next meeting with your client during your Team Presentation
 - Your client knows who you are - there is no need to reintroduce your team during your Team Presentation

Team Project Presentation

Your assignment is to deliver a presentation to your client (Prof. Lanter will act as the owner/manager of the business.)

During your 15-minute presentation your team is responsible for explaining following:

- 1. The objectives of cyber security**
- 2. The process of achieving cyber security**
- 3. How to begin the process of achieving cyber security**
- 4. The homework assignment your client needs to complete and bring to the next meeting**

Deliverables

Your team will deliver your presentation during Unit #5.

By end of Unit #5c each student should submit to Canvas in PDF format the following:

1. Team project PowerPoint slide presentation
2. Any materials your team prepared to help your client
3. Your 360-degree review, answering the questions:
 - What you contributed to your team's project?
 - What each other member of the team contributed to the project?

The teams not presenting are responsible for:

- A. *Listening to each presentation made by other teams*
- B. *Asking clarifying questions of the presenting teams to identify any gaps, inconsistencies or issues in the presentation – in the 10 minutes after the presentation is over*
