TECHNICAL PROJECTS

Slot Machine   April 2020 – May 2020
- Design and programmed a casino-like Slot Machine that with the clicking of a button it may spin and generate either a set of three images that may match or may not match at all.
- This program is designed, programmed, and edited in Java language as well as implemented with JavaFX programming languages.

WORK EXPERIENCE

CA (Conference Assistant)
Student Center Operations and Conference Services
Temple University, Philadelphia, PA   May. 2022 – Aug. 2022
- Serve and engage guests from more than sixty conferences, camps, and workshops.
- Effectively balance the needs of guests and teammates while upholding standards of conduct and policies.
- Effectively work with teammates as well as by myself during desk and On-Duty shifts, understanding the needs of others as well as to be open to possible options on how to engage challenges and/or problems encountered during the shift.

IT Tech Consultant (Student Worker)
Fox School of Business Temple University Philadelphia, PA   Aug. 2022 - Present
- Communicating solutions to problems clearly and accurately.
- Ability to learn modern technologies.

- Ability to share the knowledge learned and be willing to show others how to use University-supported technology effectively.
- Ability to be patient and willing to answer fewer challenging questions over and over again.
- Troubleshooting PCs as well as upgrading and installing software.
- Removal and set up of PCs as well as fixing the issues encountered along the way.
- Proficiency in imaging both PCs and IOS laptops, with special software related to the needs of the school.
- Proficiency training people in various tasks, to prepare them for the school year, and to proficiently complete the different tasks at hand.
