EXPERIENCE
LT Analytics/1614 E 17th St. Suite C Santa Ana, CA 92705   May 2022 - August 2022
LT Analytics Internship

- Reconciled and complied insurance claim data for mid-size high deductible commercial clients, performed EDA (exploratory data analysis), and drafted formal visualization reports for various line of business such as workers compensation, automobile liability, and property.
- Developed automation of claim data preparation, increasing efficiency, and allowing more time for value-added analysis.
- Sampled, collected, and cleaned recent sold real estate data through Zillow by zip code including the sold price, size of property, build-year, type of property, average school rating, etc. to create and optimize a linear regression property pricing model in R.
- Used the pricing model to generate Listing Agent Pricing Report including the following items: central estimated price, 40-80% price confidence interval, and recent sold nearby property summary tables/visualizations.
- Helped on business proposal preparations, identified, and formulated components necessary to maximize success.
