EXPERIENCE

EXTERN, Remote   May 2024 – June 2024
Webacy Blockchain and Web3 Security Research Extern
- Conducted comprehensive blockchain technology analysis by identifying emerging blockchain technologies and assessing their market positioning and technological offerings.
- Analyzed Web3 security competitors, delineating their product offerings, strategic market placement, and consumer insights to spotlight potential market disruptors.
- Synthesized research findings to enhance company competitiveness in the digital landscape.
- Worked autonomously and with colleagues from across the globe to meet ambitious deadlines in an immersive 4-week experience.

STUDENT SUCCESS CENTER, Philadelphia, PA   September 2022 – August 2023
Tutor
- Engage with students seeking academic support in French and provide the tools needed to help students develop a fuller understanding of and confidence in the field
- Build strong relationships with assigned students by demonstrating active communication and good interpersonal skills that facilitate trust in the academic experience of the tutor
- Collaborate with assigned students, working effectively to solve problems with understanding academic material, adapting to student needs and abilities to provide the most beneficial tutoring session.

HT BEAUTY SUPPLY, Abidjan, Cote D'Ivoire   July 2022 – August 2022
Administrative Assistant
- Translated contracts and communication from French to English to assist in building partnerships and contracts with foreign businesses. Assisted hiring manager in conducting interviews to help select future employees, providing a second opinion to mitigate implicit bias in the hiring process
- Aided in planning and set-up for a special event, verifying details were arranged in advance of the event and providing support on the day of the event to ensure the event ran smoothly
- Utilized proficiency in Microsoft Office Suite to handle administrative correspondence, update inventory spreadsheets, and create presentations with attention to accuracy and detail.

PROJECTS
Mars Rover Photo Analysis, Web Application Development   March 2023 – May 2023
- Developed a data visualization web application showcasing Mars Rover photographic metrics, utilizing NASA's Rover Photo API.
- Implemented interactive charts for visualizing rover photo frequency and operational lifespan using JavaScript and Image Charts library.
- Published the comprehensive project, including documentation and codebase, on GitHub for public access and utilization, demonstrating clear and structured code management practices.
